Strategic Corporate Social Responsibility Debbie Haski-Leventhal, 2025-09-10 In today's world being the best in the world is no longer enough. Businesses are now expected to be the best for the world socially and environmentally responsible, sustainable and ethical. This updated edition of *Strategic Corporate Social Responsibility* offers a comprehensive approach to CSR, presenting key concepts, theories and practical tools for real world application. The book is divided into three parts: theoretical background, CSR approaches and implementation, and measuring and communicating CSR. New to this edition is a chapter on social and global issues along with three new case studies from Africa, Asia and Latin America. The content has been extensively revised, adding summary questions at the end of each chapter and highlighting cutting edge technology including AI, machine learning, virtual reality and blockchain. Featuring case studies from globally recognized brands like Ben & Jerry's, Google, H&M and Unilever, this book is an essential resource for students on Corporate Social Responsibility modules. Debbie Haski-Leventhal is Professor of Management at Macquarie Business School and an expert on corporate social responsibility, CSR, responsible management education, RME and volunteerism. Detailed updates for the 3rd edition. Nearly half the book is rewritten. The book is restructured for a better flow as are many of its chapters. It now has many new images and figures too. New cases from outside the US such as Fairphone, The Netherlands, Sony Japan and Lush, The UK and many new mini cases from around the globe including Egypt, Bangladesh and China. A new and more holistic definition of Strategic CSR with six original components. An emphasis on how cutting edge technologies such as AI, machine learning, virtual reality and blockchains can serve responsible and sustainable business. Each chapter now ends with summary questions that be used in class or for assessment. A new and powerful Foreword by Professor David Cooperrider, a CSR leader and the father of appreciative inquiry and several new endorsements. Additional exercises and questions for interactive learning together with revised online materials such as a teaching guide and PowerPoint presentations. Updated references and links after each case study and chapter with up to date literature and thinking.

The Digital Transformation of the Automotive Industry Uwe Winkelhake, 2017-12-15 Building on his decades of experience as a consultant and project manager in the automotive industry, the author develops comprehensive and pragmatic recommendations for action regarding the digital transformation of the automotive and supplier industries. At the heart is the transition from a vehicle focused to a mobility oriented business model. Based on the catalysts of the digital change, four digitisation fields are structured and a roadmap for their transformation is presented. The topics of comprehensive change in corporate culture and an agile and efficient information technology are covered in detail as vital success factors. Selected practical examples of innovative digitisation projects provide additional ideas and impulses. An outlook on the automotive industry in the year 2040 completes the discourse.
