

HOW CLOSELY RELATED ARE

Mortgage Rates and House Prices?

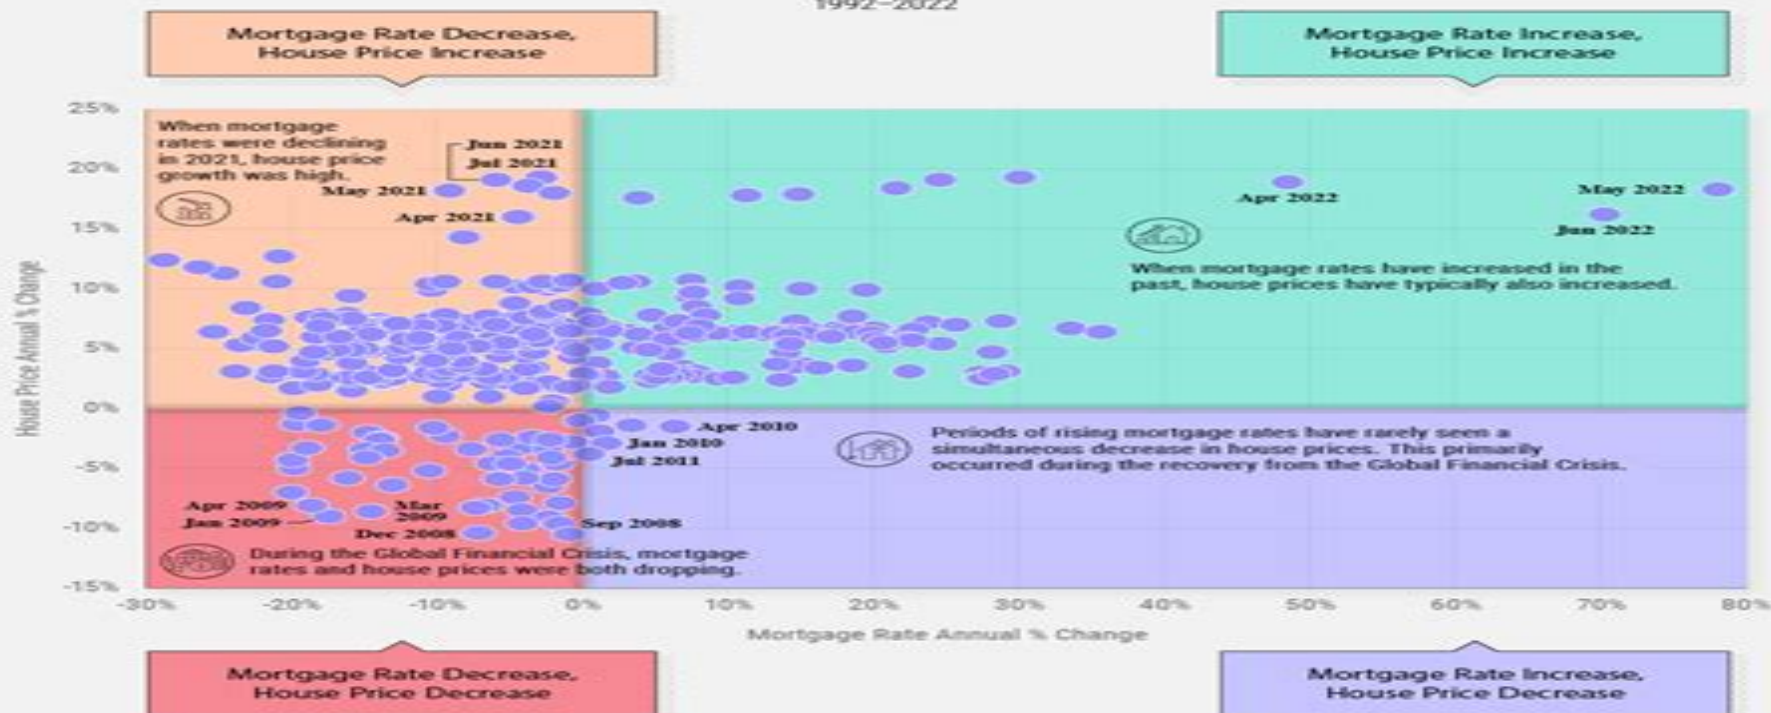

As mortgage rates rise, it becomes more expensive to finance a home purchase. This leaves many homebuyers with lower budgets. Could house prices drop as a result?

Below, we explore how house prices have historically fluctuated alongside mortgage rate changes from 1992–2022.

Source: Federal Reserve, Federal Housing Finance Agency (Aug 2022). Annual percentage changes shown using monthly data. Mortgage rate data is based on the 30-year fixed rate mortgage average in the United States and is not seasonally adjusted. House price data is from the Not Seasonally Adjusted Purchase Only Index. The FHFA House Price Index is a weighted, repeat-sales index, meaning that it measures average price changes in repeat sales on the same properties. This information is obtained by reviewing repeat mortgage transactions on single-family properties whose mortgages have been purchased or securitized by Fannie Mae or Freddie Mac since January 1992.

Mortgage Interest Rate Problem United States. Congress. Senate. Committee on Banking and Currency,1953

Mortgage Interest Rate Problem, Hearing Before ..., 83-1 ..., January 28, 1953 United States. Congress. Senate. Banking and Currency Committee,1953 *The Pricing-Out Phenomenon in the U.S. Housing Market* Francesco Beraldi,Mr. Yunhui Zhao,2023-01-06 The COVID 19 pandemic further extended the multi year housing boom in advanced economies and emerging markets alike against massive monetary easing during the pandemic In this paper we analyze the pricing out phenomenon in the U S residential housing market due to higher house prices associated with monetary easing We first set up a stylized general equilibrium model and show that although monetary easing decreases the mortgage payment burden it would raise house prices lower housing affordability for first time homebuyers and increase housing wealth inequality between first time and repeat homebuyers We then use the U S household level data to quantify the effect of the house price change on housing affordability relative to that of the interest rate change We find evidence of the pricing out effect for all homebuyers moreover we find that the pricing out effect is stronger for first time homebuyers than for repeat homebuyers The paper highlights the importance of accounting for general equilibrium effects and distributional implications of monetary policy while assessing housing affordability It also calls for complementing monetary easing with well targeted policy measures that can boost housing affordability particularly for first time and lower income households Such measures are also needed during aggressive monetary tightening given that the fall in house prices may be insufficient or too slow to fully offset the immediate adverse impact of higher rates on housing affordability *Verbatim Record of the Proceedings* United States.
