## **Out Of It A Cultural History Of Intoxication:**

*Out of it* Stuart Walton, 2002 *Out of It* is a superbly informed and sharply observed tour through the history, legality and chemistry of the many substances we use to get high. Dealing with the full range of drugs including cocaine, cannabis, caffeine, ecstasy, nicotine, heroin and alcohol and their effects, Stuart Walton's book also has a shocking but compelling central argument that we not only have an abiding desire to consume intoxicating substances but actually have a right to do so. And that the harm they can do is greatly outweighed by the variety of experience they make possible and the considerable enjoyment we derive from taking them. **The Hangover** Jonathon Shears, 2020 What is a hangover? How does it feel to suffer from one? What can hangovers tell us about the way attitudes to alcohol have developed over time? This book sets out to answer these questions and many others by examining hangover literature from the Renaissance to the present day.

**Mental and Neurological Public Health** Vikram Patel, Alistair Woodward, Valery Feigin, Stella R. Quah, Kristian Heggenhougen, 2010-06-07 Colin Mathers who leads the Global Burden of Disease group in WHO has confirmed that in the 2004 GBD 13.1% of global Daily Adjusted Life Years are attributable to mental or neurological disorders. While the proportions vary very widely from about 10% in low income countries to over 25% in high income countries, it is clear that there is a need for understanding how to address this issue. This volume aims to provide a comprehensive overview of the public health principles of mental and neurological disorders. This vast range of health conditions affects people across the life course from developmental disabilities in childhood to schizophrenia and substance abuse in adults and dementia in old age. Despite this diversity, they all share many features: they are mostly mediated through brain dysfunction or abnormalities, are often chronic in course, typically benefit from multi-component interventions and are amongst the most neglected conditions in global health. The volume will bring together chapters from the Psychiatry, Neurology, Substance Abuse and Child Development sections of the Encyclopedia of Public Health. The volume will be the first comprehensive text on a public health approach to this diverse group of health conditions and has no obvious competitor. Highlights the common features of many mental and neurological disorders. Provides insights into potential cross over methods of identification and treatment. Includes chapters on the most frequently diagnosed mental and neurological challenges faced by public health systems.

Tracy, 2004 Virtually every American alive has at some point consumed at least one and very likely more consciousness altering drug Yet if the use of drugs is a constant in American history the way they have been perceived has varied extensively Just as the corrupting cigarettes of the early twentieth century coffin nails to contemporaries became the glamorous accessory of Hollywood stars and American GIs in the 1940s only to fall into public

disfavor later as an unhealthy and irresponsible habit the social significance of every drug changes over time The essays in this volume explore these changes showing how the identity of any psychoactive substance from alcohol and nicotine to cocaine and heroin owes as much to its users their patterns of use and the cultural context in which the drug is taken as it owes to the drug's documented physiological effects Rather than seeing licit drugs and illicit drugs recreational drugs and medicinal drugs hard drugs and soft drugs as mutually exclusive categories the book challenges readers to consider the ways in which drugs have shifted historically from one category to another From publisher's description **New Scientist and Science Journal**, 2004 **Esquire**, 2004 **Forthcoming Books** Rose Arny, 2003 **A Cannabis Reader** European Monitoring Centre for Drugs and Drug Addiction, 2008 In Volume 1 we can read an autobiographical article on events in the United Kingdom in the late 1960s recent cannabis developments in the EU's new Member States the cannabis resin trade linking Morocco to northern Europe the closure of Pusher Street in the Copenhagen commune of Christiania and information on how coffee shops developed in the Netherlands While these articles focus only on smaller pieces of the cannabis puzzle they provide insights into the many different ways Europe has dealt with cannabis **New Scientist**, 2004 **American Book Publishing Record**, 2003 **Alcohol** Carl R.
