entire software engineering life cycle Topics as diverse as requirements analysis concurrency and model checking need to find a composite working partnership in software engineering practice This convergence arises from need not dogma and the solutions required are those that will have the right effect on the associated activities in the world of the application e.g. reducing the time for a transaction or making the results of a complex analysis available in real time While the business of outsourcing continues to be studied the engineering innovations that make it compelling are constantly changing It is in this milieu that this series of conferences has placed itself **Encyclopedia of Information Science and Technology** Mehdi Khosrow-Pour, Mehdi Khosrowpour, 2009 This set of books represents a detailed compendium of authoritative research based entries that define the contemporary state of knowledge on technology Provided by publisher **Encyclopedia of Information Science and Technology, First Edition** Khosrow-Pour, D.B.A., Mehdi, 2005-01-31 Comprehensive coverage of critical issues related to information science and technology

outsourcing companies must carefully select who to outsource to. Although general guidelines exist for those companies to consult, they are not customizable to the unique needs of each company and project. By assessing the type of a company's outsourceable project and its in-house capabilities regarding the project, the main outsourcing goal of the company is first determined. Depending on the goal, the essential issues to be considered in making outsourcing decisions are then prioritized systematically. Case studies have been conducted to support the set prioritization patterns followed by an examination of current limitations and possible future work.
