all his narrative The book's main theme is the difficult interface between word and image that Calvino struggled with throughout his career the act of perception that rendered visible that which was invisible and transformed what was seen into what is read Ricci holds that Calvino's narrative has an imagocentric program and that his literary strategy is ekphrastic i.e. it is characterized by literary description of visual representation real or imaginary The book is interdisciplinary in nature and will interest not only scholars of literature but also those who work with the visual arts and with information technology
