### Psychological Components of

Sustainable Peace Peter T. Coleman,Morton Deutsch,2012-06-15 Scholarship on the psychology of peace has been

accumulating for decades The approach employed has been predominantly centered on addressing and preventing conflict and violence and less on the conditions associated with promoting peace Concerns around nuclear annihilation enemy

images discrimination denial of basic human needs terrorism and torture have been the focal points of most research The

Psychological Components of a Sustainable Peace moves beyond a prevention orientation to the study of the conditions for increasing the probabilities for sustainable cooperative peace Such a view combines preventative scholarship with a

promotive orientation to the study of peaceful situations and societies The contributors to this volume examine the

components of various psychological theories that contribute to the promotion of a harmonious sustainable peace Underlying

this orientation is the belief that promoting the ideas and actions which can lead to a sustainable harmonious peace will not only contribute to the prevention of war but will also lead to more positive constructive relations among people and nations

and to a more sustainable planet The Psychological Components of a Sustainable Peace is valuable and stimulating reading for researchers in peace psychology political psychology and conflict resolution as well as others who are interested in developing a sustainable harmonious world

### *Why People Radicalize* Kees Van Den Bos,2018-09-03 In Why People

Radicalize Kees van den Bos argues that if we want to truly understand radicalization and prevent attenuate and fight violent extremism and terrorism we must pay attention to what is driving the radicalization process This implies that we should systematically analyze how radicalizing persons interpret the world For example perceptions that certain situations are

fundamentally unfair and hence need to be changed are among the core issues that drive Muslim right wing and left wing

radicalization Furthermore experiences and perceptions of unfairness and injustice can tempt those who struggle with self control to break the law and engage in violent extremist and terrorist behavior Why People Radicalize is among the first

attempts to provide a systematic integrative and in depth analysis of the psychology of unfairness judgments and the ways these judgments impact on various radicalization processes Discussing several conceptual and practical implications that

follow from this line of reasoning the book emphasizes the role of careful scientific thought and the notion of taking individuals seriously as judgments of unfairness are not merely perceptions They feel genuine to the persons forming the judgments This volume discusses in detail how these radicalization processes can develop and what components are of

pivotal relevance in these processes Accessible for scientists professionals and practitioners the book explains how uncertainty and insufficient self corrections influence this process Finally the book delineates future research issues on radicalization extremism and terrorism and applies the analysis to appropriate legal contexts making the book relevant for policy and decision makers among others *Criminal Law Forum* ,2015 **Multi-Level Reconciliation and**

**Peacebuilding** Kevin P. Clements,SungYong Lee,2020-12-06 This edited volume examines the group dynamics of social reconciliation in conflict affected societies by adopting ideas developed in social psychology and the everyday peace discourse in peace and conflict studies The book revisits the intra and inter group dynamics of social reconciliation in conflict affected societies which have been largely marginalised in mainstream peacebuilding debates By applying social psychological perspectives and the discourse of everyday peace the chapters explore the everyday experience of community actors engaged in social and political reconciliation The first part of the volume introduces conceptual and theoretical studies that focus on the pros and cons of state level reconciliation and their outcomes while presenting theoretical insights into dialogical processes upon which reconciliation studies can develop further The second part presents a series of empirical case studies from around the world which examine the process of social reconciliation at community levels through the lens of social psychology and discourse analysis This book will be of much interest to students of peacebuilding conflict resolution social psychology discourse analysis and international relations in general **Encyclopedia of Violence, Peace, &**

**Conflict** Lester R. Kurtz,2008 The 2nd edition of Encyclopedia of Violence Peace and Conflict provides timely and useful information about antagonism and reconciliation in all contexts of public and personal life Building on the highly regarded 1st edition 1999 and publishing at a time of seemingly inexorably increasing conflict and violent behaviour the world over the Encyclopedia is an essential reference for students and scholars working in the field of peace and conflict resolution studies and for those seeking to explore alternatives to violence and share visions and strategies for social justice and social change Covering topics as diverse as Arms Control Peace Movements Child Abuse Folklore Terrorism and Political Assassinations the Encyclopedia comprehensively addresses an extensive information area in 225 multi disciplinary cross referenced and authoritatively authored articles **The Philosopher's Index** ,2008 Vols for 1969 include a section of abstracts

Genocidal Nightmares Abdelwahab El-Affendi,2014-11-20 This book offers a novel and productive explanation of why ordinary people can be moved to engage in destructive mass violence or terrorism and the abuse of rights often in large numbers and in unexpected ways Its argument is that narratives of insecurity powerful horror stories people tell and believe about their world and others can easily make extreme acts appear acceptable even necessary and heroic As in action or horror movies the script dictates how the hero acts The book provides theoretical justifications for this analysis building on earlier studies but going beyond them in what amount to a breakthrough in mapping the context of mass violence It backs its argument with a large number of case studies covering four continents written by prominent scholars from the relevant

countries or with deep knowledge of them A substantial introduction by the UN's Special Advisor on the Prevention of Genocide demonstrates the policy relevance of this path breaking work [The Middle East, Abstracts and Index](#), 1999

*Preventing Mass Atrocities* Barbara Harff, Ted Robert Gurr, 2018-10-10 What can be done to warn about and organize political action to prevent genocide and mass atrocities The international contributors to this volume are either experts or practitioners often both who have contributed in substantial ways to analyzing high risk situations recommending preventive policies and actions and in several instances helping to organize remedial actions Whereas current literature on the prevention of genocide is theoretically well grounded this book explores what can be done and has been done in real world situations Recommendations and actions are rooted in a generation of experience based on solid historical comparative and empirical research and with a grounding in quantitative methods This volume examines historical cases to understand the general causes and processes of mass violence and genocide and engages with ongoing genocidal crises including Darfur and Syria as well as other forms of related violence such as terrorism and civil conflict It will be key reading for all students and scholars of genocide war and conflict studies human security and security studies in general **The Prevention and**

**Intervention of Genocide** Samuel Totten, 2017-09-08 Over the last twenty years the world has witnessed four major genocides There was the genocide in Iraq 1988 in Rwanda 1994 in Srebrenica 1995 and in Darfur 2003 and continuing Most observers agree there is an urgent need to assess the international community's efforts to prevent genocide and to intervene once a genocide is under way in an effective and timely manner This volume the latest in a widely respected series on the subject of genocide provides an overview of a host of issues germane to this task The book begins with a cogent discussion of the issues of prevention and intervention during the Cold War years The second chapter discusses the abject failures and moderate though in some cases highly controversial successes at prevention and intervention carried out in the 1990s and early 2000s Further chapters examine latest efforts to develop an effective genocide early warning system and examine the complexity of and barriers to prevention The pros and cons of sanctions and the problems of enforcement and evaluation their effectiveness are then discussed Conflicts between state sovereignty and the protection of threatened populations are examined both in historical context and by incorporating the latest thinking Later chapters treat the issue of intervention why and how it has met with only limited success Concentrating on Rwanda and Srebrenica chapter 8 discusses various peace operations that were abject failures and those that were moderately successful The concept of an anti-genocide regime is examined in terms of progress in developing such a regime as well as what the international community must do in order to implement it Chapters discuss key issues related to post-genocidal periods those that need to be addressed in order to establish stability in a wounded land and populace as well as to prevent future genocides The final chapter asks whether bringing perpetrators to justice has any impact in breaking impunity ensuring deterrence and bringing about reconciliation The contributors to the volume are all noted scholars some of whom specialize in the study of genocide and others who

specialize in such areas as early warning peacekeeping and sanctions Confronting Evils Claudia Card,2010-07-22 In this contribution to philosophical ethics Claudia Card revisits the theory of evil developed in her earlier book The Atrocity Paradigm 2002 and expands it to consider collectively perpetrated and collectively suffered atrocities Redefining evil as a secular concept and focusing on the inexcusability rather than the culpability of atrocities Card examines the tension between responding to evils and preserving humanitarian values This stimulating and often provocative book contends that understanding the evils in terrorism torture and genocide enables us to recognise similar evils in everyday life daily life under oppressive regimes and in racist environments violence against women including in the home violence and executions in prisons hate crimes and violence against animals Card analyses torture terrorism and genocide in the light of recent atrocities considering whether there can be moral justifications for terrorism and torture and providing conceptual tools to distinguish genocide from non genocidal mass slaughter Confronting Evil James Waller,2016-05-27 This groundbreaking book from one of the foremost leaders in the field presents a fascinating continuum of research informed strategies to prevent genocide from ever taking place to avert further atrocities once mass murder occurs and to prevent further turmoil once a society learns how to rebuild itself Mass Hate Neil Kressel,2008-08-04 Mass Hate explores why the brutality of humankind erupted and flowed more expansively in the twentieth century than ever before Psychologist Neil Kressel recommends specific steps to help stem this bloody global tide of slaughter terror and genocide In his investigation Kressel focuses on the horrifying butchery in Rwanda the terrifying tactics of rape and torture of women in Bosnia the systematic murder of Jews and others during the Holocaust He examines history psychology and political science for explanations of what propels a citizen to raise a machete against innocent neighbors and in a moving conclusion suggests practical ways for humankind to eradicate the causes of mass hate Now included in the preface is a discussion of the terrorist attack of September 11 2001 on New York and the Pentagon

War on Hate Henry Kopel,2021-07-12 The UN outlawed genocide in 1948 and the United States launched a war on terror in 2001 yet still today neither genocide nor terrorism shows any sign of abating This book explains why those efforts have fallen short and identifies policies that can prevent such carnage The key is getting the causation analysis right Conventional wisdom emphasizes ancient hatreds poverty and the impact of Western colonialism as drivers of mass violence But far more important is the inciting power of mass ideological hate propaganda this is what activates the drive to commit mass atrocities and creates the multitude of perpetrators needed to conduct a genocide or sustain a terror campaign A secondary causal factor is illiberal dualistic political culture this is the breeding ground for the extremist us vs them ideologies that always precipitate episodes of mass hate incitement A two tiered policy response naturally follows from this analysis in the short term several targeted interventions to curtail outbreaks of such incitement and in the long term support for indigenous agents of liberalization in venues most at risk for ideologically driven violence

Impediments to the Prevention and Intervention of Genocide Samuel Totten,2017-09-08 Academics NGOs the United

Nations and individual nations are focused on the prevention and intervention of genocide Traditionally missions to prevent or intervene in genocide have been sporadic and under resourced The contributors to this volume consider some of the major stumbling blocks to the avoidance of genocide Bartrop and Totten argue that realpolitik is the major impediment to the elimination of genocide Campbell examines the lack of political will to confront genocide and Theriault describes how denial becomes an obstacle to intervention against genocide Loyle and Davenport discuss how intervention is impeded by a lack of reliable data on genocide violence and Macgregor presents an overview of the influence of the media Totten examines how the UN Convention on Genocide actually impedes anti genocide efforts and how the institutional configuration of the UN is itself often a stumbling block Addressing an issue that is often overlooked Travis examines the impact of global arms trade on genocide Finally Hiebert examines how international criminal prosecution of atrocities can impede preventive efforts and Hirsch provides an analysis of the strengths weaknesses and effectiveness of major international and national prescriptions developed over the last decade The result is a distinguished addition to Transaction s prestigious Genocide Studies series
