**Overshoot** Population Institute, 2015 **Racial Climates, Ecological Indifference** Nancy Tuana, 2023 While the heavy social impacts of raging wildfires punishing storms and climbing temperatures worldwide have made many increasingly aware of the need for climate justice the intersection of race and climate change has too often been neglected in the literature and in practice In *Racial Climates Ecological Indifference* author Nancy Tuana urges that engagement with histories and lineages of ecological indifference and systemic racism leads to a more robust understanding of the nature of climate injustices Applying her ecointersectional framework Tuana reveals how racist institutions and practices often fuel environmental destruction and contribute to climate change Building on the work of Black feminist theorists she demonstrates that the basic social structures that generate environmental destruction are the same as those that generate systemic oppression making clear that the more traditional focus on the differential distribution of harms and benefits of climate change while important constitutes only one dimension of climate injustice due to systemic racism This book provides a more adequate account of racial climates by disclosing the additional dimensions of climate injustice Ultimately Tuana underscores that any effort to protect the environment must also be a fight against systemic racism and other forms of systemic inequity **A Future Beyond Growth** Haydn Washington, Paul Twomey, 2016-04-14
