

SCOOTER OWNERS MANUAL

Safety warning:

For your safety we recommend that you read the entire manual before assembling or using this scooter. Mod Scooters also recommends periodically reviewing all the information in this manual with any younger rider who may use this scooter.

Before you ride:

It is good practice to check your scooter before you ride. Younger riders may need assistance. (see maintenance and assembly section)

- Replace all worn parts on your scooter immediately. Riding with worn parts can be hazardous for both the rider and scooter.
- Mod Scooters have been designed to a high standard. Only replace worn parts with genuine Mod Scooter spares and accessories. Customising your scooter with other non Mod accessories will invalidate any warranty.
- Always wear proper protective equipment such as a helmet, knee and elbow pads, making sure they are adjusted to fit securely. Some skateparks will require appropriate safety equipment to be worn for entry to be granted so it is good practice to wear it at all times.
- Always wear appropriate foot wear. Never try riding without shoes or in loose footwear. Never wear sandals and always keep shoe laces secure and away from moving parts.
- Bolts, etc. can work loose and parts can wear over time, so check your scooter every time you ride. Scootering can be dangerous, so use this scooter at your own risk and above all use with common sense.

(Under all) circumstances use your scooter in the wet. Wheel and headset bearings will seize, the grip tape will start to peel or fall off and the scooter may rust. No part however new that has been used in wet or damp conditions is applicable to any warranty or replacement.

Safe riding:

- Always look up when riding and keep both hands on the handbars at all times.
- Before riding make sure the scooter fork is facing forward.
- Only ride on smooth flat surfaces away from roads and motor vehicles, avoiding drainage gullies and sudden surface changes. Failure to do this may result in the scooter stopping suddenly.
- Be aware of your surroundings. Watch out for pedestrians, animals, bikes and other riders etc.
- Avoid surfaces with water, wet leaves, sand, ice and loose stones or grit on them.
- Never use your scooter on grass or in the mud.
- Never ride with a motorised device.
- Always leave enough room to slow or stop. Be aware that different conditions and surfaces will alter your stopping distance.
- Excessive use of the brake will flat spot wheels, so avoid braking excessively for long periods of time. The brake can also become hot after use so do not touch this with your bare hands.
- Remember to be aware of other riders when riding. It is also polite to practice "scooter etiquette" when at skate parks to avoid any collisions with other riders. Take it in turns and don't run into dropping in, as it is dangerous and not polite.
- Trick riding will damage the scooter faster as no one ever lands his or her first trick without bending it a few times. Advanced riders will wear more parts than most - full!
- This scooter is designed to the highest manufacturing standards and is extremely durable, however parts in time will wear and are not impervious to damage. Regular maintenance will prolong the scooter's life.

Scooter Parts:

- | | | | | |

Assembling your

scooter:

- Step 1: To assemble your new scooter first unpack all components ensuring all small parts are kept safe. Then remove the front wheel from the fork using two allen keys.
- Step 2: Slide the fork into the headset from the bottom. Slide plastic headset wedge on top of the fork, then metal spacer washer and then headset top cap. (ref image 'a')
- Step 3: Place the handle bars over your forks and fit your scooter upside down. Tighten and align the M8 IC3 bolt that goes from the bottom of your forks into a slot which is pre-welded inside your bars. (ref image 'b')
- Step 4: As the IC3 bolt becomes tighter align your front wheel so that it is facing forwards with your bars.
- Step 5: Tighten up your clamp. It is very important to tighten each bolt a turn at a time. This ensures an even and secure grip around your bars and eliminates the risk of flexing your clamp. (ref image 'c')

Note image 'd' shows the internal section of your scooter. It shows the Fork, Clamp, Stems and Bars.

Please check all bolts are tight before use and also recheck regularly. Please read the general maintenance section of this manual.

Changing your wheels or Bearings:

1. Remove the wheel from your scooter using the provided allen keys. (ref pic 'f')
2. Knock out the bearings carefully from the middle using an allen key or punch and a hammer.
3. Keep the spacer from the middle safe.
4. Press one of the bearings into your wheel you may need to use a vice to keep it square or tap gently with a rubber hammer.
5. Insert the wheel spacer, ensuring it remains in an upright position.
6. Press in your second bearing and reassemble back onto the scooter.
