## **Panzers I & II Germanys Light Tanks:**

**Panzers I & II** Bob Carruthers, 2013-05-17 The first vehicle to be produced in any numbers for the Panzerwaffe was the tiny Panzer I known as the MG Panzerwagen. Almost from the outset the limitations of the design for the Panzer I were obvious. It was essentially a training vehicle which was only pressed into service as a last resort. It was to be succeeded by the Panzer II which could at least engage armoured cars and combat against tanks with approximately the same armour as itself. Together these two tanks formed the bulk of the armour which between 1939 and 1941 conquered half of Europe. This comprehensive overview of the light Panzers in action was compiled by Emmy Award winning historian Bob Carruthers. It draws heavily on war time intelligence reports to produce a fascinating insight into the development and combat history of the light Panzers at the tactical and operational level. Also featured are rare developments such as the Panzer II flame thrower variant alongside unpublished photographs and illustrations which provide an absorbing study from an array of primary sources of the world of the light Panzer and their crews from contemporary Allied sources. **Panzers I & II** Bob Carruthers, 2013 The first vehicle to be produced in any numbers for the Panzerwaffe was the tiny Panzer I known as the MG Panzerwagen. At the outbreak of the Second World War Hitler's Wehrmacht led the way in armored warfare as blitzkriegs overwhelmed Poland and North West Europe. The contribution of light tanks such as Panzers I, II and 35 t was critical. As the war spread to the Balkans, North Africa and the invasion of Russia, German engineers modified existing light tanks and developed new models. These included tank destroyers such as the Marder III, Panzerjäger SdKfz 138/1 and 139. There were anti-aircraft variants including the Flakpanzer 38 t and reconnaissance tanks such as the SdKfz 140/1 and the Aufklärungspanzer 38 t. This superbly illustrated book gives a comprehensive overview of the multitude of German light tanks that came into service. With the text and captions providing technical data, the images show this formidable array of fighting vehicles in action across the theatres of war. **German Panzer I** David Doyle, Jeff

Dougherty,2017-09-19 Counting down from 50 to the very best at number 1 Top 50 Tanks features the greatest armored fighting vehicles from World War I to present day      Light Panzers Thomas Anderson,2025-04-22 This highly illustrated new study tells the full story of the German light Panzers in World War II The light Panzers that equipped the first Panzer divisions were originally intended as training or stopgap machines suitable only until the arrival of the better armed and armoured PzKpfw III and PzKpfw IV However despite their limitations they ended up playing key roles in the victorious campaigns waged by the German Army from 1939 to 1942 This highly illustrated title describes the development and organizational history of the PzKpfw I introduced in 1934 and the PzKpfw II introduced in 1936 It explains how the annexation of German speaking Sudetenland in 1938 and subsequently of Czechoslovakia itself delivered an unexpected bonus for the Panzerwaffe in the form of two Czech Army light tanks introduced into German service as the PzKpfw 35 t and PzKpfw 38 t It goes on to cover the considerable operational service of these tanks in Poland France and the invasion of the Soviet Union in 1941 From late 1941 onwards they were withdrawn from front line service but the chassis were used until the end of the war for self propelled artillery and tank destroyers German armour expert Thomas Anderson draws on archival material after action reports and rare photographs in this comprehensive study of the German light Panzers that played a key role in the early years of World War II      *Panzers Forward* Robert Edwards,2018-10-01 Panzers Forward collects photos of all varieties of German armor from the smaller tanks of the early war to the gigantic Tigers that came later on all fronts North Africa Sicily and Italy France and of course the Eastern Front Written by a trio of experts who have lived and breathed panzers for decades the captions identify vehicles as well as their location and units explain markings and camouflage and give background information on the vehicles and their battles      **Guderian's Panzers** Craig W.H. Luther,2025-09-09 From unstoppable blitzkrieg to brutal defeat follow Guderian s panzers as they race toward Moscow and collide with disaster On June 22 1941 Nazi Germany launched Operation Barbarossa the surprise

invasion of the Soviet Union that opened the Eastern Front in World War II With lightning speed and devastating success the German army tore through Soviet territory and rolled over the Red Army scoring some of the most dramatic victories in military history until the blitzkrieg bogged down during the approach on Moscow At the spearhead of the attack was General Heinz Guderian one of the most celebrated and controversial commanders of the war who commanded a tank group in the center of the German front that stretched from the Baltic to the Black Sea Guderian's Panzers reconstructs Barbarossa from the perspective of Generaloberst Guderian and his 2nd Panzer Group With the German war machine at the height of its martial prowess in June 1941 Guderian's group of 250 000 men and 900 tanks rapidly broke through the Soviet frontier defenses and thrust some 600 kilometers into Soviet Russia in a matter of weeks in doing so playing an integral part in the successful encirclement cauldron battles of Belostok Minsk June July 1941 and Smolensk July August 1941 each of these battles resulting in the loss of several Soviet armies and hundreds of thousands of prisoners Despite having sustained alarming losses of personal and equipment in these opening battles Guderian pushed his men and himself to even greater achievements culminating in the triumphant cauldron Battle of Kiev in the Ukraine September 1941 that obliterated Soviet Southwestern Front and resulted in the capture of over 600 000 Red Army POWs It was perhaps Germany's greatest victory in WWII and Guderian had made it happen In October November 1941 the German Ostheer Eastern Army launched a desperate attempt to seize Moscow and once again Heinz Guderian and his tank troops were at the forward edge of battle Yet by the end of November the entire German offensive exhausted stretched thin dangerously reduced in strength and suddenly largely paralyzed by the fall rain and snow had ground to a halt Meanwhile in early December the resurgent Red Army launched a major counteroffensive that in the weeks ahead not only threatened Guderian's forces with annihilation but those German Army Group Center writ large Guderian and the Ostheer as a whole were now trapped in a remorseless war of attrition they could never win Refusing his superiors orders to stand fast in the face to the advancing Soviet juggernaut Guderian continued to jerk back in retreat with the remnants of his forces and thus was relieved of his command on 26 December 1941 Military historian and Eastern Front expert Craig Luther draws on new material from letters to diaries to tell the story of Guderian's armored force during Operation Barbarossa and fleshes out the story with vivid firsthand accounts from the soldiers who slugged it out with the Red Army on the Eastern Front The book traces the ups and downs of Guderian and his panzer group during six pivotal months of World War II and explains why and how the Germans especially its panzers achieved such impressive successes only to be defeated on Moscow's doorstep
