

## Your Windows everywhere

Sign in and your device is instantly alive because your personalization, including background, and settings are all there. Whether you set it up perfectly for you or change it often when you upgrade, never a laptop or PC lights up with anything that requires Windows update. Anytime you turn on a PC, you have a personalized cloud-connected experience through that same Microsoft account. Windows 8 gives you a seamless experience between your devices and your personal cloud services.

Start a project on one PC, and finish it on another. When you use the cloud to store your information, the boundaries between devices disappear. Your apps, games, music, photos, files, and settings aren't stored on one device, they're in one place: the cloud.

## Connected to your people

One mail and messaging app to communicate with all your friends, family, and co-workers. And you won't need to sync them twice. If you have contacts all over the place, you're in luck because whether you originally added a contact in Microsoft Messenger, Facebook, Twitter (Group), or some other service, if you choose to connect them, that contact is available in your app as soon as you sign in to your Microsoft account. You can have a fully connected address book with the People app. See the people you care about, their updates, and all the different ways to communicate and share with them—of course, place. And you won't have to worry about losing your contacts. If you get a new Windows 8 PC or Windows Phone, the People app is your most complete address book.

The People app makes it easy to connect to the ones you care about.

## Connected to your files

Your Microsoft account is like a portable, personal PC that appears on any Windows 8 device you're using. You'll be ready to pick up where you left off by signing in. There's another reason to put files in the cloud: with an Internet connection, photos and other files on Microsoft SkyDrive® are instantly as accessible as anything on your PC, and you can access them from any web-connected device.

Bottom line: cloud-connected gives you access to practically everything on your PC.

## Connect your apps to the cloud

Developers can take advantage of the services Microsoft provides in their apps, without having to connect to the cloud. When developers connect apps to the cloud using the live API, they can take advantage of single sign-on, which gets users even deeper into their app experience because they'll be able to more easily share data and communicate with their friends and family.
