Noise and Vibration Control in the Built Environment Jian Kang, 2018-03-23 This book is a printed edition of the Special Issue Noise and Vibration Control in the Built Environment that was published in Applied Sciences *Promoting Healthy and Supportive Acoustic Environments: Going beyond the Quietness* Francesco Aletta, Jian Kang, 2020-11-04 This book gathers 14 original contributions published in an IJERPH Special Issue that deal with the perception of environmental sounds and how such sounds are likely to affect human quality of life and well being and the experience of a place The research focus over the years has been gradually shifting from treating sound simply as noise and something that cities should get rid of to a potential resource to promote and support community life in public spaces Three main topics or needs to be addressed by researchers and practitioners emerged from this Special Issue 1 the need to re think quietness in cities as something that goes beyond the mere pursuit of silence 2 the need to integrate additional contextual factors in the characterization and management of urban acoustic environments for public health and 3 the need to consider the acoustic quality of indoor spaces as opposed to an outdoor only perspective The contributions collected in this book will hopefully trigger new questions and inform the agenda of future researchers and practitioners in the environmental acoustics domain

Acoustics in the Built Environment: a Challenge for Improving the Quality of Life Arianna Astolfi, Giuseppina Emma Puglisi, Nicola Prodi, Jian Kang, Louena Shtrepi, Chiara Visentin, 2022-05-30 **Urban Roar** Jordan Lacey, 2022-02-10 Urban Roar argues for the existence of autonomous affectivities that roar beneath the din of the urban seeking the attention of us humans so captured by the environments of our own making In hearing the urban roar it is the mythic intention of this book to discover ways in which we can work with the intensities of more than human forces to vitalize our cities The book explores methods by which artists particularly those sound artists involved in fieldwork practices might encounter and translate autonomous affectivities between different environments Of particular interest is Jung s concept of synchronicity and its relationship to artistic creation as experience flow and catalyst in manifesting autonomous affectivities into diverse and affective environments The book makes use of both theoretical and practical approaches from a study of scholarship through which it is argued that an autonomous affectivity is equivalent to an archetype via Jung and an essence via Deleuze s reading of Spinoza to theoretical considerations of the situated body in everyday contexts to practical study of an artistic research experiment designed to reveal and index autonomous affectivities encountered during fieldwork practices for the purpose of influencing urban design interventions In this fresh analysis Lacey reveals the possibilities in urban environments

Soundscape and the Built Environment Jian Kang, Brigitte Schulte-Fortkamp, 2018-10-09 Soundscape Basics and Practical Implications Soundscape research represents a paradigm shift as it involves human and social sciences and physical measurements to account for the diversity of soundscapes across countries and cultures Moreover it treats environmental sounds as a resource rather than a waste Soundscape and the Built Environment is the first book to systematically discuss

soundscape in the built environment It begins with a presentation of theory and basic background answering questions such as what is soundscape how is it important and how does it affect people in terms of their health and perception on the acoustic environment The book then sets out tools for implementing a soundscape approach with measurement techniques mapping and good soundscape practices It also delivers a series of examples of the application of the soundscape approach in planning design and assessment Discusses soundscape and environmental noise Explores cultural variations and the way they influence soundscape Introduces binaural measurement technology and psychoacoustics Examines the physical psychological and physiological restorative mechanism of high quality acoustic environments Presents soundscape mapping based on human perception of sound sources Includes real world examples and case studies highlighting the key issues in soundscape intervention Soundscape and the Built Environment is written by a group of leading international figures and derives from a four year EU COST project on Soundscapes of European Cities and Landscapes It presents a consensus on the current state of the art and is not merely a collection of different views It is written for acoustic consultants urban planners designers and policy makers as well as for graduate students and researchers

Urban Sound Environment Jian Kang, 2006-09-13 Over the past two decades there have been many major new developments in the field of urban sound environment Jian Kang introduces and examines these key developments including the development of prediction methods for urban sound propagation establishment and application of noise mapping software new noise control measures and design methods Also Sound and Noise Marcia Jenneth Epstein, 2020-10-30 This book is about how you listen and what you hear about how to have a dialogue with the sounds around you Marcia Jenneth Epstein gives readers the impetus and the tools to understand the sounds and noise that define their daily lives in this groundbreaking interdisciplinary study of how auditory stimuli impact both individuals and communities Epstein employs scientific and sociological perspectives to examine noise in multiple contexts as a threat to health and peace of mind as a motivator for social cohesion as a potent form of communication and expression of power She draws on a massive base of specialist literature from fields as diverse as nursing and neuroscience sociology and sound studies acoustic ecology and urban planning engineering anthropology and musicology among others synthesizing and explaining these findings to evaluate the ubiquitous effects of sound in everyday life Epstein investigates speech and music as well as noise and explores their physical and cultural dimensions Ultimately she argues for an engaged public dialogue on sound built on a shared foundation of critical listening and provides the understanding for all of us to speak and be heard in such a discussion Sound and Noise is a timely evaluation of the noise that surrounds us how we hear it and what we can do about it

Noise and Vibration Control in the Built Environment, 2017 Research on Soundscape Identification - A Case Study in Shenzhen, China Yu Lei, Jian Kang, 2019 Exploring Associations Between Soundscape Assessment, Perceived Safety and Well-being: a Pilot Field Study in Granary Square, London Francesco Aletta, Luca Molinero, Arianna Astolfi, Sonja Di Blasio, Louena Shtrepi, Tin Oberman, Jian Kang, 2019

Evaluating Sound Environment in Shenzhen by Using Artificial Neural Networks Chen Xing,Zhixiang Tao,Yu Lei,Jian Kang,2019 *Noise and Vibration Control in the Built Environment* ,2017 With global urbanization rapidly rising and the increasing need of high quality built environments the requirement of achieving improved sound quality both for outdoor and indoor environments has received a lot of attention This Special Issue collection reflects the current state of the art with 12 papers covering environmental acoustics the influence of soundscapes on people s behavior soundscape pleasantness estimation tranquility perceived quality of sonic environments sound and vibration related health complaints concerning tramways and the disturbance of construction machines as well as in building and room acoustics including natural ventilation enabling fa ade noise control devices the effect of external shading devices rating method of airborne sound insulation water supply and drainage noise and the effect of diffusive surfaces in auditoria Some papers cover research on the engineering aspects of sound and vibration such as sound propagation and noise control techniques as well as perception aspects of sound such as indoor acoustic comfort and environmental soundscapes The book is prefaced by Prof S Wu entitled Sustainable Urban Sound Environment
