Pursuing Quality, Access, and Affordability Stephen C. Ehrmann, 2023-07-03 Whether they recognize it or not virtually all colleges and universities face three Grand Challenges Improve the learning outcomes of a higher education A large majority of college graduates are weak in capabilities that faculty and employers both see as crucial Extend more equitable access to degrees Too often students from underserved groups and poor households either don't enter college or else drop out without a degree The latter group may be worse off economically than if they'd never attempted college Make academic programs more affordable in money and time for students and other important stakeholder groups Many potential students believe they lack the money or time needed for academic success Many faculty believe they don't have time to make their courses and degree programs more effective Many institutions believe they can't afford to improve outcomes These challenges are global But in a higher education system such as that in the United States the primary response must be institutional This book analyzes how over the years six pioneering colleges and universities have begun to make visible cumulative progress on all three fronts

[Digital Transformation and Internationalization Strategies in Organizations](#) Yıldız, Orkun, 2021-10-15 Competitive strategies and higher education industry collaboration policies are playing an important role in fostering the reputation and international rankings of higher education institutions The positive impact of these policies may best be observed in economic and social outputs of many countries such as the USA Singapore South Korea EU countries and Turkey However the number of academic publications that specifically concentrate on the impact of these policies on higher education institutions and authorities remains relatively limited *Digital Transformation and Internationalization Strategies in Organizations* covers a wide range of issues and topics including employment systems quality management systems international ranking systems in higher education education and language policies in higher education and business models employed in techno parks This book helps higher education institutions manage their manpower and become cognizant of the factors that may exert a drastic impact on their success It is ideal for managers executives IT consultants researchers practitioners academics professors and undergraduate and postgraduate students

Saving Higher Education Martin J. Bradley, Robert H. Seidman, Steven R. Painchaud, 2011-09-09 Praise for *Saving Higher Education* At last a book that answers one of higher education's most burning questions How do we provide America a cheaper faster undergraduate experience without cheating on the old family recipe and compromising standards At a time when challenges of college value quality and mission are high on the public agenda and an unprecedented number of institutions are exploring three year degree programs we are provided a road map that maintains academic integrity by focusing on learning outcomes rather than process inputs Bravo and about time This book will add value and inform the thinking of all stakeholders even the most skeptical of faculty A three year baccalaureate aligns the academy with the needs and aspirations of the future While enhancing effectiveness it affords students what they want and need while meeting the

national agenda for socially and economically productive citizens Stephen Joel Trachtenberg president emeritus and University Professor of Public Service George Washington University This book provides a powerful model of how to redesign a university in the interests of student learning The authors proposed curriculum model addresses many of the fundamental dysfunctions of higher education the fragmentation incoherence and unfocused activity that produces the dispiriting results of our enormous investment They offer an evidence based framework for reshaping our institutions to serve the goals we all wish to achieve while beginning to address the pervasive financial challenges that undermine our efforts This book provides a vivid and stimulating analysis of how to think about and execute constructive change Anyone concerned about the future of higher education should read it and learn from it John Tagg professor emeritus Palomar College and author The Learning Paradigm College This book offers one thoughtful approach to a high quality education at a significantly lower cost If educators respond students will win Margaret L Drugovich president Hartwick College

Nursing Informatics Marion J.

Ball, Judith V. Douglas, Patricia Hinton Walker, Donna DuLong, Brian Gugerty, Kathryn J. Hannah, Joan Kiel, Susan K. Newbold, Joyce E. Sensmeier, Diane J. Skiba, Michelle R. Troseth, 2011-01-21 Like the three editions that preceded it this new edition targets markets in health care practice and educational settings It addresses practicing nurses and nursing students together with nursing leadership and nursing faculty It speaks to nursing informatics specialists and in a departure from earlier editions of this title to all nurses regardless of their specialty extending its usefulness as a text as noted below In recognition of the evolving electronic health information environment and of interdisciplinary health care teams the book is designed to be of interest to members of other health care professions quality officers administrators etc as well as health information technology professionals in health care facilities and in industry The book will include numerous relevant case studies to illustrate the theories and principles discussed making it an ideal candidate for use within nursing curricula both undergraduate and graduate as well as continuing education and staff development programs This book honors the format established by the first three editions by including a content array and questions to guide the reader This 4th edition also includes numerous brief case studies that help to illustrate the theories and practices described within the various chapters Most of these mini cases are provided by members of professional nursing organizations that comprise the TIGER Initiative These mini cases are listed in the front matter and highlighted via formatting throughout the text
