Magmatic Rifting and Active Volcanism T.J. Wright, A. Ayele, D.J. Ferguson, T. Kidane, C. Vye-Brown, 2016-09-06 A major rifting episode began in the Afar region of northern Ethiopia in September 2005. Over a ten day period c 2.5 km³ of magma were intruded along a 60 km long dyke separating the Arabian and Nubian plates. Over the next five years a further 13 dyke intrusions caused continued extension, eruptions and seismicity. This activity led to a renewed international focus on the role of magmatism in rifting with major international collaborative projects working in Afar and Ethiopia to study the ongoing activity and to place it in a broader context. This book brings together articles that explore the role of magmatism in rifting from the initiation of continental break up through to full seafloor spreading. We also explore the hazards related to rifting and the associated volcanism. This work has implications for our understanding of how continents break up and the associated distribution of resources in rift basins and continental margins.

Genesis Too Rob Ransone, 2019-10-21 Genesis Too: A Rational Story of How All Things Began and the Main Events that Have Shaped Our World. A Resolution of Creationist and Evolutionist Theories of the Creation of the Universe. By Rob Ransone. Genesis Too addresses such sensitive issues as: Where did that first particle come from that resulted in the Big Bang and what was it? Why are creationist and evolutionist theories of the Universe both right? Why is there Free Will? Why is there evil in the world? Is God really omnipotent? Was Jesus God's only son? Is there a heaven or a hell? Why are Islamic terrorists not following the teachings of Muhammad? Why does the US Government only back scoundrels in other countries? Why is Johannes Gutenberg the most important individual who ever lived? Of the American, French and Russian revolutions, why is the French Revolution the most important? What were the three worst decisions made during World War II? What were the two worst decisions made by US presidents? Why did all 22 US intelligence agencies fail to prevent 9/11 even though the preparations were in plain sight? If we meet aliens from other worlds will we be the colonists or the Indians? What are the ethics of changing the human genome?

Afrasian Transformations, 2020-08-31 African Asian interactions contribute to the emergence of a decentred multi polar world in which different actors need to redefine themselves and their relations to each other. Afrasian Transformations explores these changes to map out several arenas where these transformations have already produced startling results: development, politics, South-South cooperation, cultural memory, mobile lifeworlds and transcultural connectivity. The contributions in this volume neither celebrate these shifting dynamics as felicitous proof of a new age of South-South solidarity nor do they debunk them as yet another instance of burgeoning geopolitical hegemony. Instead they seek to come to terms with the ambivalences, contradictions and potential benefits entailed in these transformations that are also altering our understanding of trans-area in an increasingly globalized world. Contributors include Seifudein Adem, Nafeesah Allen, Jan Beek, Tom De Bruyn, Casper

Rural Water Management in Africa Leticia K. Nkonya,2008 As one of the most important natural resources the management of water is becoming increasingly important as water resources are growing more scarce This is especially the case for rural areas and developing countries such as Africa In sub Saharan African SSA countries today the demand for water resources is increasing In this innovative study the author examines these forms of traditional or customary institutions of water management in a manner that has never been done before First the author provides us with an understanding and appreciation of the differential impact of customary institutions on drinking and irrigation water management Most sociological studies on rural water management in SSA have addressed water management issues without adequately analyzing customary institutions and showing how they affect rural water management Most studies in river basin management focus on water for irrigation Few studies have examined how the customary and statutory institutions influence water management for different water uses This study looks at how the management of water for domestic use differs from the management of water for livestock and small scale irrigation The second unique contribution of this book is the analysis of the role of women and how customary and statutory institutions affect women s participation in water management Few studies have looked at the role of women and their contribution to rural water management Previous studies have focused only on the statutory institutions Finally the study offers a valuable comparison of the effectiveness of statutory and customary institutions in enforcement of their regulations resolving natural resource conflicts and in ensuring

access to water for different uses Although many researchers recognize the importance of customary institutions their analysis tends to focus more on the statutory institutions for water management In this book both formal and informal water management institutions are considered for a more balanced understanding The findings of this study will serve as the basis for formulating policies and programs that include customary institutions in the management of rural water resources in Tanzania In Tanzania lack of access to safe water for many rural populations is a major concern Lack of safe water has implications for rural people and the country as a whole Policy makers nongovernmental organizations planners and water providers need to be informed so they can incorporate customary institutions into policies and strategies for management of rural water resources This is an important book for African studies environmental studies and policy studies
