Galletta, 2016-01-11 Managing and Using Information Systems A Strategic Approach Sixth Edition conveys the insights and knowledge MBA students need to become knowledgeable and active participants in information systems decisions. This text is written to help managers begin to form a point of view of how information systems will help hinder and create opportunities for their organizations. It is intended to provide a solid foundation of basic concepts relevant to using and managing information. Using Information Technology strategically Christian Kunert, 2012-09-25 Seminar paper from the year 2011 in the subject Business economics Information Management grade 2 0 University of Abertay Dundee language English abstract This report provides an evaluation of information technology IT strategies and their implementation in business through an analysis and review of business models illustrated through three case studies of business implementation. Research demonstrates that when IT is fully integrated with business processes it results in improvements to efficiency, effectiveness and efficacy of the business in turn those improvements can lead to competitive advantage. Two critical success factors are identified for successful business integration and implementation: good project management and development of the IT strategy in line with the development of business strategy. In conclusion IT can make the difference between businesses being market leaders or laggards in the future and at worst the difference between survival and failure. Current economic and market conditions have heightened the potential risk of failure but provides opportunity to those businesses that act fast to improve their Information systems IS in support of their business strategy. It is recommended that world class project methodologies are used when implementing IT and IS solutions. The project manager and team need to be carefully selected to ensure successful implementation against clearly defined success criteria within realistic time, budget and quality constraints. To ensure maximum integration with the business the involvement of knowledgeable business process owners and end users is critical. Robust stakeholder management will not only ensure successful design but will help buy in and implementation of the final solution. The case studies used in this report are drawn from the author's experience of working with these companies. **The development of Information Systems and emerging business models** Jan Harder, 2021-12-22 Seminar paper from the year 2021 in the subject Business economics Information Management grade 2 7 Lund University School of Economics and Management language English abstract Disruptive technologies have fundamentally changed the way profits are created and therefore the business models of both startups and legacy companies. The transformation of information systems as a research discipline dedicated to this topic will be discussed to then address current research on digital business models. Based on the most promising technologies of the next years emerging business models will be presented. It's nothing new that business models are changing due to new technologies but nowadays it's not just about selling your goods online but about completely new business models. How is it that some companies become successful with their digital business models and others fail and

what factors can or must be considered This is one of the tasks of the information systems discipline However since the researcher have different points of view that evolve over time and since information systems must repeatedly justify itself as a discipline first an overview of its development will be provided Then the technologies from the Gartner Hype Cycle with the highest expectations will be presented such as artificial intelligence which can itself create artifacts such as source code or design To better analyze the potential value creation opportunities that can arise from these technologies the basics of business models will first be presented and in particular how business models must be adapted to the new digital possibilities
