Office of the Directorate of Personnel Program Actions,1963      *Accountability in education: meeting our commitments* UNESCO,2017-10-30 The second edition of the Global Education Monitoring Report GEM Report presents the latest evidence on global progress towards the education targets of the UN Sustainable Development Goals With hundreds of millions of people still not going to school and many not achieving minimum skills at school it is clear education systems are off track to achieve global goals The marginalized currently bear the most consequences but also stand to benefit the most if policy makers pay sufficient attention to their needs Faced with these challenges along with tight budgets and increased emphasis on results oriented value for money countries are searching for solutions Increased accountability often tops the list The 2017 8 GEM Report shows the entire array of approaches to accountability in education It ranges from countries unused to the concept where violations of the right to education go unchallenged to countries where accountability has become an end in itself instead of a means to inclusive equitable and high quality education and lifelong learning for all The report emphasizes that education is a shared responsibility While governments have primary responsibility all actors schools teachers parents students international organizations private sector providers civil society and the media 0 3 have a role in improving education systems The report emphasized the importance of transparency and availability of information but urges caution in how data are used It makes the case for avoiding accountability systems with a disproportionate focus on narrowly defined results and punitive sanctions In an era of multiple accountability tools the report provides clear evidence on those that are working and those that are not Back cover      **Problem Gambling: Summarizing Research Findings and Defining New Horizons** Tobias Hayer,Caterina Primi,Neven Ricijas,Daniel T. Olason,Jeffrey Derevensky,2018-11-08      Do Both Psychopathology and Creativity Result from a Labile Wake-Sleep-Dream Cycle? Sue Llewellyn,Martin Desseilles,2017-12-05 Laypeople think of wake sleep and dreaming as distinct states of the mind brain but in between hybrid states are recognized For example day dreaming or more scientifically the default network occurs during wake Equally during sleep lucid dreaming in rapid eye movement REM sleep presents as another hybrid state But hybrid states are usually temporary This book explores the possibility of an enduring hybrid wake sleep dream state proposing that such a state may engender both creativity and psychopathologies REM sleep is hyper associative Creativity depends on making remote associations If REM sleep and dreaming begin to suffuse the wake state enhanced creativity may result But moderate to severe interpenetration of wake sleep and dreaming may engender psychopathologies as the functions of wake sleep and dreaming are partially eroded      Foundations of American Education L.
