Trigonometry A Unit Circle Approach *MyMathLab for Trigonometry -- Access Kit* Kirk Trigsted, 2014-04-06 MyMathLab used by more than 6 million math students provides a wide range of homework tutorial and assessment tools that make it easy to manage your course online. This is the product access code card for MyMathLab and does not include the actual bound book but does include the eBook. Kirk Trigsted revolutionized the way this course is taught when he created College Algebra, a completely clickable eText that was written from the ground up within MyMathLab. Recognizing that today's students start with the homework instead of reading the text, Trigsted created an online learning environment that is a seamless mix of exposition, videos, interactive animations, tutorials, and assessment. This approach leverages the power of MyMathLab and leads students to interact with course materials in a way that is proving to be more effective. With this new edition, Trigsted continues to innovate with a revised design with improved navigation and usability, expanded videos, and increased animation coverage. As with the prior edition, all multimedia elements, exercises, feedback, and content are written by the author himself so that the students have a consistent voice throughout the eText. **ALERT:** Before you purchase, check with your instructor or review your course syllabus to ensure that you select the correct ISBN.
