Global Epidemiology of Cancer Jahangir Moini, Nicholas G.

Avgeropoulos, Craig Badolato, 2022-03-28 **GLOBAL EPIDEMIOLOGY OF CANCER** Cancer is the second highest cause of death in the United States and a leading cause of death globally. Our goals are to discuss the global epidemiology of various cancers with detailed information on their prevalence, incidence and clinical considerations. Epidemiology is the key to understanding the mortality and morbidity of cancer and how we can prevent, diagnose and treat the disease. Prevention of cancer is essential for saving lives. Prevalence and incidence of cancer are key factors that each government and population must be aware of. Advances in the study of cancer occur on a regular basis and this book provides the latest insights about relationships between the disease and stem cells, tumorigenesis, molecular interactions, pathways, channels and immunity. **Global Epidemiology of Cancer Diagnosis and Treatment** meets the needs of readers by providing current information about epidemiology, including molecular epidemiology, diagnosis and treatment. Providing logical step by step information on various cancers, this book consolidates all of the most up to date information and data from verified studies on all different types of cancers in the United States and throughout the world. Chapters are presented so that each includes an overview, clinical manifestations, epidemiology, pathophysiology, etiology and risk factors, diagnosis, treatment, prevention and prognosis. **Global Epidemiology of Cancer Diagnosis and Treatment** will be invaluable to graduate and postgraduate students, including medical students, nurses, physician assistants, residents in oncology, public health students and allied health students.

Oncology Nursing Forum, 1998 **Oncology of Infancy and Childhood** Stuart H. Orkin, 2009 To address the growing complexities of childhood cancer, Nathan and Oski's Hematology and Oncology of Infancy and Childhood has now been separated into two distinct volumes. With this volume devoted strictly to pediatric oncology and another to pediatric hematology, you will be on the cutting edge of these two fields. This exciting new full color reference provides you with the most comprehensive, authoritative, up to date information for diagnosing and treating children with cancer. It brings together the pathophysiology of disease with detailed clinical guidance on diagnosis and management for the full range of childhood cancers, including aspects important in optimal supportive care. Written by the leading names in pediatric oncology, this resource is an essential tool for all who care for pediatric cancer patients. And as an Expert Consult title, this brand new resource comes with access to the complete contents online, fully searchable. Offers comprehensive coverage of all pediatric cancers, including less common tumors, making this the most complete guide to pediatric cancer. Covers emerging research developments in cancer biology and therapeutics, both globally and in specific pediatric tumors. Includes a section on supportive care in pediatric oncology, written by authors who represent the critical subdisciplines involved in this important
