the disruptive innovations of digital technology and the use of online distribution platforms that fuel much of the research on the more recently invented cultural media This book shows that the area of books and reading has had contributions in historically established areas of cultural economics and those currently exciting attention chiefly with respect to digital disruption Finally it explains how books and reading are a fully developed rational addition model rather than something just based on the addition of past behaviour Previously published in Journal of Cultural Economics Volume 43 issue 4 December 2019
