

### 3. Neutral the hand brake

The easiest way to move the selector lever into gear depends on the position of your hands. In either position, be conscious of the pressure applied. To ensure this gear, depress the button in the handle of the selector lever (B). If it is not in the correct position, the gear will not be set.

After manually downshifting, the selector lever will move into the gear you require, unless the footrest, accelerator and release levers are kept in a depressing position.

An "upshift and clutch lockout" system will also prevent "B".

### Roll-down device

The roll-down device gives movement to the selector lever when the accelerator pedal is pressed down past the full throttle position. Depending on road speed and engine speed, the gear is either shifted forward or backward. The transmission changes from one gear to the next gear.

### WARNING

Be careful when using the roll-down on slippery roads. Rapid acceleration may cause skidding.

### Driving the Automatic transmission

#### Starting the engine

The selector lever must be in **N (Neutral)** or **P (Park)** if one of the driving positions is engaged. Unless the clutch and parking brake have been applied.

### Selecting a driving position

#### WARNING

When the selector lever is in a driving position, the vehicle may move from its stop position. Always apply the hand brake and parking brake to keep the vehicle steady and be concentrated for the vehicle to move as a driving position is selected.

If the engine must be running, underload any driving position engaged when selecting under the hand brake with the selector lever. To correctly lock the lever into **P** position with the parking brake fully set. Otherwise, the tendency to go back speed may not be sufficient to maintain, even with the parking brake applied.

Do not accelerate while selecting a driving position. At the time the engine must run at idle speed or stop, the clutch should be placed on the accelerator pedal in the transmission.

If the selector lever is incorrectly moved into **D (Forward)** while you are driving, take your foot off the accelerator pedal and wait for the speed before selecting a driving position.

Never shift into **R (Reverse)** or **P (Park)** when the vehicle is in motion.

#### Putting off

Put it on. Wait for the selector lever to engage the gear. A light will come on when the selector lever is in **P**.

#### Downshifting

Downshifting between forward **D** and **N** or **P** is manual. When downshifting, the vehicle will be light during downshift and when the selector lever is in **P** and the engine is running at idle.

#### Shift to drive, road or lock

When downshifting between forward **D** and **N** or **P**, the selector lever will be in **N** or **P** for a short time. The selector lever will be in **N** or **P** for a short time. The selector lever will be in **N** or **P** for a short time.

### WARNING
