## **Panzer II Vs 7tp Poland 1939:**

Panzer II vs 7TP David R. Higgins,2015-05-20 Hitler's lightning invasion of Poland in 1939 marked the beginning of World War II in Europe. This was the period when armoured warfare inscribed itself into global consciousness as the Poles desperately sought to stave off the Blitzkrieg. At the heart of the fighting on the ground, large numbers of Nazi Germany's PzKpfw II battled against Poland's better armed but much less numerous 7TP tank. The two types both possessed unique strengths and weaknesses: unlike the 7TP, the PzKpfw II was always equipped with radio, which proved critical for command and control purposes in the heat of combat. But the German tank was blighted by thin armour which could not withstand Polish gunfire at combat ranges. This fully illustrated, detailed work evaluates the qualities and idiosyncrasies of each tank, giving a stark and arresting crewman's eye view of the brutal armoured combat at the height of the invasion of Poland.

*Rommel's Ghost Division* David Mitchelhill-Green,2024-07-25 Adolf Hitler invaded Western Europe on 10 May 1940. After breaking through the supposedly impenetrable Ardennes, Erwin Rommel was at the forefront of the Wehrmacht's audacious drive through France. Rommel, who had no prior experience leading an armoured division in combat, moved with such speed and nerve that he frequently surprised French units by arriving far earlier than expected. Crossing the Meuse River, we follow Rommel in what he referred to as practically a lightning Tour de France as he pushed through northern France to the English Channel. His spectacular victory at the coastal port of Saint Valéry-en-Caux was crowned by the capture of Cherbourg. Following the armistice, Rommel was involved in reenacting certain battles, such as crossing the Somme, for the documentary *Sieg im Westen*. Victory in the West. This is the story of Rommel and the 7th Panzer Division, the so-called Ghost Division in France, 1940.

Remembering World War II Anastasia Glawion,2023-03-31 The book demonstrates an evidence-based approach to online memory practices of World War II. Network analysis is applied to reduce a massive and unreadable dataset of forum texts and user relations. Further, the results are combined with other text analysis methods, such as topic modeling and contrastive stylometric analyses. A sample of discussions from each group is read and categorized. Based on the results, the forum users' memory practices are labelled as empirical, conversational, and consensational practices, whereby recent theoretical developments in Memory Studies are considered.

**Bazooka vs Panzer** Steven J. Zaloga,2016-11-17 World War II saw tanks assume a dominant role in warfare, capable of tearing through the enemy lines if left unchecked. To combat the threat posed by these armoured behemoths, the United States developed the M1 Anti Tank Rocket Launcher, better known as the Bazooka. First employed in combat during 1942, the weapon required a great deal of skill and courage to use effectively. By late 1944, it was a mainstay of the US infantry's anti-tank capabilities alongside towed weapons, anti-tank grenades, and other longer-established measures. Focusing on the savage close-quarters fighting between Germany's armoured divisions and the US infantry during the Battle of the Bulge, Steven Zaloga's absorbing study compares and assesses the strengths and limitations of the cutting-edge technology used by both sides. Featuring specially commissioned
