

<b>Session title: Group facilitation – managing group dynamics</b>
<b>Time:</b> 50 mins
<b>Materials:</b> <ul style="list-style-type: none"> <li>❖ Slide 8</li> <li>❖ Flipchart and pens</li> </ul>
<b>Objective:</b> <ul style="list-style-type: none"> <li>➢ Participants are aware of the additional skills required to facilitate groups</li> <li>➢ Participants have practical tips for dealing with group dynamics</li> </ul>
<b>Context:</b> <p>Group facilitation is key to the PMSD process, because of the importance of the participatory element. There are a number of aspects of the process that will require you to bring together a diverse group of people, elicit learning and discussion and build consensus and joint action plans. It incorporates many of the skills we have already looked at, but there are some additional skills too.</p>
<b>Process:</b> <p><i>Discuss:</i></p> <ul style="list-style-type: none"> <li>• What have you already learned in this module, which could be useful in facilitating groups?</li> <li>• What additional skills and abilities do you need to facilitate a group?</li> </ul> <p><i>Present:</i></p> <p>One of the key additional skills is about managing group dynamics. One of the greatest challenges for a facilitator is what to do when the session does not go to plan, either because of a ‘difficult’ person or an unproductive group dynamic. In reality, sessions rarely go exactly to plan and your ability to tune into the group and shift your approach accordingly is key to achieving your desired outcomes.</p> <p><i>Activity:</i></p> <p><b>Step 1</b></p> <ul style="list-style-type: none"> <li>• Reflecting on meetings and workshops that you have participated in, what are some of the challenging dynamics and behaviours you have observed? <i>[5-minute brainstorm with whole group]</i></li> <li>• Thinking about the people you will be working with, which of these dynamics do you think will be most likely and most challenging? Come up to the flipchart and put a coloured dot by one of these. <i>[note the top 3-5 challenging dynamics/behaviours as voted by the group – depending on how many groups you will get them in for the next step]</i></li> </ul> <p><b>Step 2</b></p> <ul style="list-style-type: none"> <li>• Get people into small groups [approx. 5 people per group] and give them one of the top challenging dynamics/behaviours</li> <li>• Each group must <u>nominate a group facilitator</u> to lead the discussion</li> <li>• <i>[slide 8]</i> Discuss the dynamic or behaviour you have been allocated -</li> </ul>

**Impact Assessment** David P. Lawrence, 2013-06-03 Offers solutions and best practices to respond to recurrent problems and contemporary challenges in the field Since the publication of the first edition of Environmental Impact Assessment in 2003 both the practice and theory of impact assessment have changed substantially Not only has the field been subject to a great deal of new regulations and guidelines it has also evolved tremendously with a greater emphasis on strategic environmental sustainability and human health impact assessments Moreover there is a greater call for impact assessments from a global perspective This Second Edition now titled Impact Assessment to reflect its broader scope and the breadth of

these many changes offers students and practitioners a current guide to today's impact assessment practice. Impact Assessment begins with an introduction and then a chapter reviewing conventional approaches to the field. Next, the book is organized around recurrent problems and contemporary challenges in impact assessment process design and management, enabling readers to quickly find the material they need to solve tough problems, including:

- How to make impact assessments more influential, rigorous, rational, substantive, practical, democratic, collaborative, ethical, and adaptive.
- How each problem and challenge reducing process would operate at the regulatory and applied levels.
- How each problem can be approached for different impact assessment types: sustainability assessment, strategic environmental assessment, project level EIA, social impact assessment, ecological impact assessment, and health impact assessment.
- How to link and combine impact assessment processes to operate in situations with multiple overlapping problems, challenges, and impact assessment types.
- How to connect and combine impact assessment processes.

Each chapter first addresses the topic with current theory and then demonstrates how that theory is applied, presenting requirements, guidelines, and best practices. Summaries at the end of each chapter provide a handy tool for structuring the design and evaluation of impact assessment processes and documents. Readers will find analyses and new case studies that address such issues as multi-jurisdictional impact assessment, climate change, cumulative effects assessment, follow-up, capacity building, interpreting significance, and the siting of major industrial and waste facilities. Reflecting current theory and standards of practice, Impact Assessment is appropriate for both students and practitioners in the field, enabling them to confidently respond to a myriad of new challenges in the field.
