Complexity and Leadership Kiran Chauhan, Emma Crewe, Chris Mowles, 2022-09-12 Leading organisations in our contemporary world means grappling with unpredictability painful pressures and continual conflict all in the context of an acceleration in the pace of change We expect the impossible from heroic leaders and they rarely live up to expectations With countless recommendations self help books and new concepts scholars and management consultants often simplify and dream unrealistically This book challenges the more orthodox discourse on leadership and presents a way of thinking about leadership that pays closer attention to experience The contributors in this book all senior managers or facilitators of leadership development resist easy solutions new typologies or unrealistic prescriptions Writing about their experiences in Denmark the UK Israel Ethiopia South Africa and beyond they are less concerned with traits that people can possess and learn or magical promises of recipes for success and more with the socio political process of the interaction between people from which leadership emerges as a theme We focus on understanding leadership as a practice within which communication research imagination and ethical judgements are continuously improvised So rather than idealising leadership or reducing it to soothing tools and techniques we suggest how leaders might become more politically emotionally and socially savvy This book is written for academics and practitioners with an interest in the everyday challenges of both individual and group practices of formal and informal leaders in different types of organisations and is an ideal resource for executives and students on leadership development programmes We hope this volume will help readers to expand the wisdom found in their own experience and discover for themselves and for others a greater sense of freedom

Leadership Development in Practice Kevin Flinn, 2023-10-31 In an unpredictable world how do we go about supporting leaders to develop more democratic and inclusive ways of working and living The second edition of Leadership Development in Practice A Complexity Approach draws on autoethnographic accounts of experience from practitioners across three continents to explore the leadership development approaches that best support managers to work with uncertainty by taking their experience seriously It offers an alternative perspective on leadership and organisation for business schools consultancies and corporate training functions to adopt in their development of leaders Additions to this second edition include as follows A new chapter on creating large group dialogue A more explicit emphasis on what it means to take gender diversity and social justice seriously A review of the burgeoning interest in complexity perspectives on leadership and leadership development since publication of the first edition This book is essential reading for leadership and organisational development professionals researchers and students It will also be of interest to managers looking for an approach to leadership development that works with how things are rather than with idealisations of how things ought to be

Small, Large, and Median Groups Rachel Lenn, Karen Stefano, 2012 This book is a remarkable tribute to the memory of Pat de Mare It contains a selection of his work that represents his different understanding of groups both large and small that has not only had a significant impact on the practice of group in his life

time but also a potential for revolutionizing current thinking both now and in the future

The Group Dimension Claire Bacha, 2024-07-24 The Group Dimension presents a thorough exploration of the history and theory of the group dimension particularly in the context of modern capitalist society The book traces the development of capitalism from feudalism where the first polis groups can be identified and describes the growth of the power of the state prescribed by John Maynard Keynes to form neoliberalism Bacha then explores the deep history of human groups examines how our brains are built for and by multibody interactions and understandings and provides an overview of our knowledge of groups building on findings from group analysis The book concludes by exploring how an understanding of groups their facilitation and their consciousness redefines current individualistic and autistic freedom to build the new world through dialogue The Group Dimension will be essential reading for anyone involved in groups as practitioners or clients It will also be of interest to readers looking to learn more about groups in the context of modern politics social and liberation movements
