Almost Free Modules P.C. Eklof,A.H. Mekler,2002-04-29 This book provides a comprehensive exposition of the use of set theoretic methods in abelian group theory module theory and homological algebra including applications to Whitehead s Problem the structure of Ext and the existence of almost free modules over non perfect rings This second edition is completely revised and updated to include major developments in the decade since the first edition Among these are applications to cotorsion theories and covers including a proof of the Flat Cover Conjecture as well as the use of Shelah s pcf theory to construct almost free groups As with the first edition the book is largely self contained and designed to be accessible to both graduate students and researchers in both algebra and logic They will find there an introduction to powerful techniques which they may find useful in their own work *1998 Report of the Refrigeration, Air Conditioning, and Heat Pumps Technical Options Committee* United Nations Environment Programme. Urofsky,2005 Money greases the wheels of American politics from the local level to the White House In the 2004 presidential campaign President George W Bush alone raised nearly 400 million in private and public funds nearly twenty times the combined total raised by John Kennedy and Richard Nixon in 1960 to defeat challenger John F Kerry further fueling anxiety over the power of money to dictate political results Melvin Urofsky one of our nation s most respected legal historians takes a fresh look at efforts to rein in campaign spending and counter efforts in the courts to preserve the status quo He offers a thoughtful and balanced overview of campaign finance reform and the legal responses to it from the Progressive era through the Supreme Court s landmark ruling in *McConnell v FEC* 2003 and its impact on the 2004 election

Urofsky focuses especially on the 1971 Federal Election Campaign Act and 2002 McCain Feingold or Bipartisan Campaign Reform Act BCRA and on challenges to both in the Supreme Court In Buckley v Valeo 1976 the Court upheld contribution limits but struck down expenditure caps on First Amendment grounds In McConnell it upheld the key provisions of McCain Feingold In both cases however opponents argued that congressional control of campaign financing was an unconstitutional infringement of the free speech rights of campaign contributors Urofsky deftly steers the reader through this contentious and complex history revealing how both Congress and the courts have navigated uneasily between the Scylla of potential corruption and the Charybdis of suppressing political speech Ironically despite the Court's decision upholding McCain Feingold the 2004 presidential election was the most expensive in history because as Urofsky notes money is the mother's milk of politics and both candidates and donors will always find ways to keep it flowing His book provides an excellent and succinct guide to the controversies and historical debates emerging from that fact **An Interferometric and Numerical**
