Data and Teaching Joseph P. McDonald, Nora M. Isacoff, Dana Karin, 2018 Drawing on their research in nine of New York City's most poverty impacted schools the authors dive deep into school systems and routines as well as into teachers practices and students experiences They also zoom out to capture the larger currents that have made this school reform strategy so prominent today Each chapter includes a discussion of a new direction that schools and teachers can take to ensure that data use in teaching actually spurs growth in learning This resource extracts lessons from both chaotic and productive data implementation in order to inform practice and fulfill hopes for better schooling richer teaching and deeper learning A detailed and fascinating account of how distributive leadership collaboration and professional learning can greatly and positively influence teachers effective use of data Randi Weingarten president American Federation of Teachers **Data and Teaching** offers a rare and subtle blend of generous witnessing discerning analysis and practical directives for educational innovation and improvement Sara Lawrence Lightfoot professor Harvard University Essential reading for anyone committed to improving teaching as either a practical or an intellectual matter James Spillane professor Northwestern University Finally a book on using data to improve schools that goes beyond a theoretical framework and explores what really happens when teachers try to do this work Every school and district should read it Ron Berger EL Education

Readers Front and Center Dorothy Barnhouse, 2023-10-10 Every teacher wants and expects his or her students to be reading increasingly complex texts yet sometimes the gap between our expectations and our students abilities seems wide and deep It's tempting to look at that gap and step in to fill it for them but then we'd be doing most of the heavy lifting the understanding analysis and interpretation that our students should be learning for themselves So how can teachers reverse this trend and ensure that our students are fully entering absorbing and experiencing texts How can we make sure they're making complex meaning independently and proficiently as the Common Core State Standards require *Readers Front and Center* why we need to put students at the front and center of our teaching ReadyGen Pam Allyn, 2016 **ReadyGen** Pam

Students Ofelia García, Tatyana Kleyn, 2016-06-10 Looking closely at what happens when translanguaging is actively taken up to teach emergent bilingual students across different contexts this book focuses on how it is already happening in classrooms as well as how it can be implemented as a pedagogical orientation It extends theoretical understandings of the concept and highlights its promises and challenges Using a Transformative Action Research design six empirically grounded ethnographic case studies describe how translanguaging is used in lesson designs and in the spontaneous moves made by teachers and students during specific teaching moments The cases shed light on two questions How when and why is translanguaging taken up or resisted by students and teachers What does its use mean for them Although grounded in a U S
