Rochow,2012-11-28 Bachelor Thesis from the year 2010 in the subject Psychology Social Psychology grade 1 0 Uppsala University language English abstract In the age of social networking and music streaming playlists are a common tool for organizing sharing or exchanging music in the digital realm Most research however emphasizes mainly political legal and ethical constraints of music sharing practices yet neglects their social impact Thus this paper investigates the social psychological foundation of the playlist and analyses its functionality in establishing social relations and communication Following the theories of Cooley Mead Simmel and Solomon I conducted and analysed interviews with young Swedish men and women in which they talked about their experiences and attitudes towards playlists Moreover all participants compiled their own personal playlist based on certain personality traits which were aimed to be recognized by the others during the focus group discussion The analysis of the data yields the following conclusions The playlist is a social object facilitating new forms of communication The social nature of the playlist is based on the transformation from objective into subjective culture By internalizing new technologies such as the playlist objects gain social value thus mere musical content becomes a social form It is through sharing and exchanging musical compilations that the playlist as a social form serves as a vehicle or medium facilitating new forms of sociation and communication The communicative function of the playlist is due to its construction through emotions as uniquely subjective judgements based on the I as an emotional self feeling Thus musical compilations take part in the self construction process and can serve as a tool for the symbolic expression of the self Moreover the analysis points out that there are differences in how well certain parts of the self can be communicated by a playlist Emotional expressions of the self are translated into particular universal music patterns most successfully Furthermore the analysis shows that some people like to browse through the playlists of others and judge them thereupon which results in some type of musical voyeurism termed playlistism In conclusion I argue that the musical playlist is both socially implicated and socially implicating **Musical Genre** Mads Krogh,2025-01-09 From recent decades digitization have emerged a myriad of techniques for mapping musical life identifying patterns in sound or musico cultural practices and compiling labels names tags and classes on an unprecedented scale Proliferating genre catalogs in the context of digital platforms and the conjunction of genre with notions of for example mood and activity are among the consequences which challenge prevailing scene based and identificational understandings in musical genre studies This book answers to this challenge Centering on the concepts of musico generic assemblage and abstraction it offers new perspectives on musical

Devaluing Public Apologies in the Age of Social Media Joshua M. Bentley,2024-12-15 In Devaluing Public Apologies in the Age of Social Media Joshua M Bentley argues that apologies are losing their meaning in American society as organizations and public figures treat them as strategical tools without considering their ethical implications As the demand for apologies in the age of social media continues to increase exponentially Bentley posits the apologies that are given carry less and less weight to the public This book examines how controversial figures like Donald Trump and Joe Rogan as well as brands like Google and Bud Light have addressed public controversies both effectively and ineffectively illustrating how social media polarization and cancel culture are changing the way apologies are given and received If apologies are to serve their historical role of resolving conflict peacefully Bentley argues they must be placed back into their proper ethical context This book offers insight on how individuals and organizations can ensure their apologies reflect their authentic values Scholars of communication ethics media studies political science and public relations will find it especially useful

media downloads mobile music streams music flat rates peer to peer networks and the rise of freeconomics on the Internet are partly responsible for the reduction in CD sales in recent years The question that is most important for the industry is how the widespread of freely available content and illegal downloading can be monetised One approach to model around the main threats to the music industry is the development of online music services Thus this study is an attempt to address the issue of what are the opportunities and challenges posed by online music services for the music recording industry Referring to empirical findings of a consumer survey and expert interviews both opportunities and challenges can be identified for the music recording industry The opportunities surrounding the development of these services are encouraging Deriving from the challenges the music recording industry must ensure that online music services are a supplement to traditional ways of consumption and do not turn into a replacement of physical music consumption Concluding online music services have a small impact on the recording industry The industry might benefit from closely cooperating with online music services by learning more about consumers tastes Nevertheless the online businesses are struggling to break even and revenues from streaming will not overcome legal downloads or CD sales as major revenue stream anytime soon
