MBA As a trained physician seeing the many types of patients in Dr Amy Lee s years of practice she has come to realize that
what she does in treating a patient with obesity is a not straightforward There is not one type of diet regimen for everyone
just as if there is not one pill that fixes all problems She finds herself working backwards by first meeting someone with the
condition of overweightness followed by digging into their history on the root cause of the outcome What needs to be
recognized is the many causes which could be genetic predisposition environmental forces complications from mental health
or simply taking a medication with adverse reactions of weight gain In order for practitioners like Dr Lee to carry out this job
they need the medical community as well as the ancillary services to recognize the complexity of what it takes to fully make
an impact in this patient population If they do not make changes and move forward this epidemic of obesity will surely
become the next pandemic Dr Lee s hope in publishing Access Addressing the Obesity Crisis is to share with her colleagues
the other side of the practice often overlooked or under recognized This is an attempt to shed a little light to what they are
doing as medical bariatricians and the impact they can make for their patients **The New York Times Magazine**
