**Leveraging Embedded Factors of Business Ecosystems. A Potential Driver for Business Model Innovations** , 2021-05-20 Master s Thesis from the year 2020 in the subject Business economics Business Management Corporate Governance grade 1 00 Catholic University Eichst tt Ingolstadt language English abstract This thesis aims to identify business ecosystem s embedded factors as potential drivers for business model innovations and thus to contribute to an expansion of innovation opportunities In the context of the consideration of different ecosystem concepts first their characteristics and roles are presented to make a precise distinction related and traditional structures e g value network supply chain Innovation ecosystems business ecosystems and platform ecosystems are considered in this study and

empirically examined employing a multiple case study To ensure the value of the study only companies that have implemented a business model innovation within one of the defined ecosystems were included Innovations within the value chain of a single company can no longer fully satisfy new and dynamic customer needs It is therefore appropriate to intensify the network of relationships outside the company This is remedied by the value contribution resulting from the companies ecosystems which is higher than that of individual companies However in the ecosystem s environment the success of a company is strongly dependent on the success of its diverse and changing collaborations with other companies of different sizes and types Due to the embedding in different ecosystems the understanding of a company as an independent strategic actor is no longer appropriate in every case
