## **Meta Emotion How Families Communicate Emotionally:**

*Meta-Emotion* John Mordechai Gottman, Lynn Fainsilber Katz, Carole Hooven, 2013-02-01 This book describes research on the emotional communication between parents and children and its effect on the children's emotional development. Inspired by the work and dedicated to the memory of Dr Haim Ginott, it presents the results of initial exploratory work with meta-emotion feelings about feelings. The initial study of meta-emotion generated some theory and made it possible to propose a research agenda. Clearly, replication is necessary and experiments are needed to test the path analytic models which have been developed from the authors' correlational data. The authors hope that other researchers will find these ideas interesting and stimulating and will inspire investigation in this exciting new area of a family's emotional life. **Translation from English Into Dutch of Three Parts of the Book "Meta-emotion"** Loes Knevels, 2000 Engaging Theories in Family Communication Dawn O. Braithwaite, Leslie A. Baxter, 2005-08-26 The breadth of theories presented and collected in this text is an impressive accomplishment. The editors have done a great service to the field with this book. Lynn H. Turner, Marquette University. The chapters are very informative, useful, and accessible. There is a huge need to better ground family communication in theory, and this text will provide an important start for students and researchers. Douglas Kelley, Arizona State University. To date, scholars from disciplines other than communication have dominated the study of family communication. *Engaging Theories in Family Communication: Multiple Perspectives* covers uncharted territory in its field as it is the first book on the market to deal exclusively with family communication theory. In this volume, editors Dawn O. Braithwaite and Leslie A. Baxter bring together a group of contributors who represent a Who's Who in the family communication field. These scholars examine both classic and cutting-edge theories to guide family communication research in the coming years. **Key Features:** A clear overview of theory and three meta-theoretical discourses: logical, empirical, interpretive, and critical, to provide readers with a current landscape of family communication research. Chapter opening notes help students understand the paradigm into which a theory falls and the historical roots of each theory. Foreword by renowned scholar Anita Vangelisti frames the current state of family communication and provides a unique perspective on theory building in family communication. *Engaging Theories in Family Communication* is designed for students studying family communication in courses such as Family Communication, Personal Relationships, Communication Theory, Applied Communication, and Advanced Interpersonal Communication. It can also be used in a variety of Family Studies, Sociology, and Psychology courses focusing on family communication. *Family Communication* Chris Segrin, Jeanne Flora, 2011-10-14 *Family Communication* carefully examines the state of the art research and theories of family communication and family relationships. In addition to presenting cutting-edge research, it focuses on classic theories and research findings that have influenced and revolutionized the way scholars conceptualize family interaction. This text offers a thorough and up-to-date presentation of scientific research in family communication for both teachers and students of family communication as well.
