Control Applications of Nonlinear Programming and Optimization G. Di Pillo, 2014-05-17 Control Applications of Nonlinear Programming and Optimization presents the proceedings of the Fifth IFAC Workshop held in Capri Italy on June 11-14, 1985. The book covers various aspects of the optimization of control systems and of the numerical solution of optimization problems. The text also discusses specific applications concerned with the optimization of aircraft trajectories of mineral and metallurgical processes of wind tunnels and of nuclear reactors. The book also considers computer aided design of control systems. The book is useful to mathematicians, engineers and computer engineers.

Intelligent Beam Control in Accelerators Zheqiao Geng, Stefan Simrock, 2023-05-11 This book systematically discusses the algorithms and principles for achieving stable and optimal beam or products of the beam parameters in particle accelerators. A four-layer beam control strategy is introduced to structure the subsystems related to beam controls such as beam device control, beam feedback and beam optimization. This book focuses on the global control and optimization layers. As a basis of global control, the beam feedback system regulates the beam parameters against disturbances and stabilizes them around the setpoints. The global optimization algorithms such as the robust conjugate direction search algorithm, genetic algorithm and particle swarm optimization algorithm are at the top layer, determining the feedback setpoints for optimal beam qualities. In addition, the authors also introduce the applications of machine learning for beam controls. Selected machine learning algorithms such as supervised learning based on artificial neural networks and Gaussian processes and reinforcement learning are discussed. They are applied to configure feedback loops, accelerate global optimizations and directly synthesize optimal controllers. Authors also demonstrate the effectiveness

of these algorithms using either simulation or tests at the SwissFEL With this book the readers gain systematic knowledge of intelligent beam controls and learn the layered architecture guiding the design of practical beam control systems [Spark: The Definitive Guide](#) Bill Chambers,Matei Zaharia,2018-02-08 Learn how to use deploy and maintain Apache Spark with this comprehensive guide written by the creators of the open source cluster computing framework With an emphasis on improvements and new features in Spark 2.0 authors Bill Chambers and Matei Zaharia break down Spark topics into distinct sections each with unique goals You'll explore the basic operations and common functions of Spark's structured APIs as well as Structured Streaming a new high level API for building end to end streaming applications Developers and system administrators will learn the fundamentals of monitoring tuning and debugging Spark and explore machine learning techniques and scenarios for employing MLlib Spark's scalable machine learning library Get a gentle overview of big data and Spark Learn about DataFrames SQL and Datasets Spark's core APIs through worked examples Dive into Spark's low level APIs RDDs and execution of SQL and DataFrames Understand how Spark runs on a cluster Debug monitor and tune Spark clusters and applications Learn the power of Structured Streaming Spark's stream processing engine Learn how you can apply MLlib to a variety of problems including classification or recommendation [Pattern Recognition and Computer Vision](#) Yuxin Peng,Qingshan Liu,Huchuan Lu,Zhenan Sun,Chenglin Liu,Xilin Chen,Hongbin Zha,Jian Yang,2020-10-14 The three volume set LNCS 12305 12306 and 12307 constitutes the refereed proceedings of the Third Chinese Conference on Pattern Recognition and Computer Vision PRCV 2020 held virtually in Nanjing China in October 2020 The 158 full papers presented were carefully reviewed and selected from 402 submissions The papers have been organized in the following topical sections Part I Computer Vision and Application Part II Pattern Recognition and Application Part III Machine Learning
