## **Applications of Operations**

**Research and Management Science for Military Decision Making** William P. Fox, Robert Burks, 2019-08-28 Based on many years of applied research modeling and educating future decision makers the authors have selected the critical set of mathematical modeling skills for decision analysis to include in this book. The book focuses on the model formulation and modeling building skills as well as the technology to support decision analysis. The authors cover many of the main techniques that have been incorporated into their three course sequence in mathematical modeling for decision making in the Department of Defense Analysis at the Naval Postgraduate School. The primary objective of this book is illustrative in nature. It begins with an introduction to mathematical modeling and a process for formally thinking about difficult problems illustrating many scenarios and illustrative examples. The book incorporates the necessary mathematical foundations for solving these problems with military applications and related military processes to reinforce the applied nature of the mathematical modeling process

## **Simulation Modelling**

Andrew Greasley, 2022-09-21 While simulation has a vast area of application this textbook focuses on the use of simulation to analyse business processes. It provides an up to date coverage of all stages of the discrete event simulation DES process covering important areas such as conceptual modelling, modelling input data verification and validation and simulation output analysis. The book is comprehensive yet uncomplicated covering the theoretical aspects of the subject and the practical elements of a typical simulation project demonstrated by cases, examples and exercises. It also shows how simulation relates to new developments in machine learning, big data analytics and conceptual modelling techniques. Guidance is provided on how to build DES models using the Arena, Simio and Simul8 simulation software and tutorials for using the software are incorporated throughout. Simulation Modelling offers a uniquely practical and end to end overview of the subject which makes it perfect required or recommended reading for advanced undergraduate and postgraduate students studying

**An Enquiry Into the Method of Paired Comparison** Thomas Brown, George Peterson, 2015-02-13 The method of paired comparisons for recording human judgments has a long history dating back at least to the late 19th century. An early English text on experimental psychology by Titchener 1901 covered paired comparisons and Thurstone 1927a 1927c brought considerable attention to the method with his psychological scaling proposals in the late 1920's. Summaries of the method are found in psychometric textbooks for example Guilford 1954 Nunnally 1976 Torgerson 1958 and from the statistical perspective in the books by David 1988 and Bock and Jones 1968

**Advances in Pairwise Comparisons** Jiri Mazurek, 2023 This book tackles issues associated with inconsistency in pairwise comparisons from both theoretical and practical perspectives. Human judgments are seldom absolutely consistent or absolutely precise therefore problems of measuring and handling inconsistency belong among hot topics of the current research especially in the theoretical framework of multiple criteria decision aiding MCDA. The book presents and discusses the state of the art of this field including both cardinal and ordinal inconsistency the problems of different scales for comparisons and inconsistency reduction and the alternative approaches to inconsistency detection and measurement. This book is a unique one stop guide for readers who are interested in inconsistency in pairwise comparisons. Researchers and practitioners in the area of multiple criteria decision making MCDM and the analytic hierarchy process AHP will find this informative book particularly valuable
