*Sports Forecasting* Martin Spann,Bernd Skiera,2014 This article compares the forecast accuracy of different methods namely prediction markets tipsters and betting odds and assesses the ability of prediction markets and tipsters to generate profits systematically in a betting market We present the results of an empirical study that uses data from 678 837 games of three seasons of the German premier soccer league Prediction markets and betting odds perform equally well in terms of forecasting accuracy but both methods strongly outperform tipsters A weighting based combination of the forecasts of these methods leads to a slightly higher forecast accuracy whereas a rule based combination improves forecast accuracy substantially However none of the forecasts leads to systematic monetary gains in betting markets because of the high fees 25% charged by the state owned bookmaker in
