Competing on Analytics Thomas H. Davenport, Jeanne G. Harris, 2007-03-06 You have more information at hand about your business environment than ever before. But are you using it to out think your rivals? If not you may be missing out on a potent competitive tool. In Competing on Analytics: The New Science of Winning, Thomas H. Davenport and Jeanne G. Harris argue that the frontier for using data to make decisions has shifted dramatically. Certain high performing enterprises are now building their competitive strategies around data driven insights that in turn generate impressive business results. Their secret weapon: Analytics, sophisticated quantitative and statistical analysis and predictive modeling. Exemplars of analytics are using new tools to identify their most profitable customers and offer them the right price to accelerate product innovation to optimize supply chains and to identify the true drivers of financial performance. A wealth of examples from organizations as diverse as Amazon, Barclays, Capital One, Harrah's, Procter & Gamble, Wachovia and the Boston Red Sox illuminate how to leverage the power of analytics. **Media Today** Joseph Turow, 2008-09-25 Media Today puts students at the center of profound changes in the twenty first century media world from digital convergence to media ownership and gives them the skills to think critically about what these changes mean for the role of media in their lives. **Documentary**, 2006
