Oscar Predictions Tips:

Holocaust Cinema Complete Rich Brownstein, 2021-10-01 Holocaust movies have become an important segment of world cinema and the de facto Holocaust education for many. One quarter of all American produced Holocaust related feature films have won or been nominated for at least one Oscar. In fact from 1945 through 1991 half of all American Holocaust features were nominated. Yet most Holocaust movies have fallen through the cracks and few have been commercially successful. This book explores these trends and many others with a comprehensive guide to hundreds of films and made for television movies. From Anne Frank to Schindler's List to Jojo Rabbit more than 400 films are examined from a range of perspectives historical, chronological, thematic, sociological, geographical and individual. The filmmakers are contextualized including Charlie Chaplin, Sidney Lumet, Steven Spielberg, Quentin Tarantino and Roman Polanski. Recommendations and reviews of the 50 best Holocaust films are included along with an educational guide, a detailed listing of all films covered and a four part index glossary.

Observation of the Earth and Its Environment Herbert J. Kramer, 2019-01-30 This book is about spaceborne missions and instruments. In addition surveys of airborne missions and of campaigns can be found on the accompanying CD ROM in pdf format. Compared with the 3rd edition the spaceborne part grew from about 300 to 1000 pages. The complete text including the electronic only chapters contains more than 1900 pages. New chapters treat the history of Earth observation and university missions. The number of commercial Earth imaging missions has grown significantly. A chapter contains reference data and definitions. Extensive appendices provide a comprehensive glossary, acronyms and abbreviations and an index of sensors. An effort has been made to present the information in context to point out relationships and interconnections. The book may serve as a reference and guide to all involved in the various national and international space programs, researchers and managers, service providers and data users, teachers and students.
