Small Groups John M. Levine, Richard L. Moreland, 2008-02-19. Research on small groups is highly diverse because investigators who study such groups vary in their disciplinary identifications, theoretical interests and methodological preferences. The goal of this volume is to capture that diversity and thereby convey the breadth and excitement of small group research by acquainting students with work on five fundamental aspects of groups. The volume also includes an introductory chapter by the editors which provides an overview of the history of and current state of the art in the field. Together with introductions to each section, discussion questions and suggestions for further reading, make the volume ideal reading for senior undergraduate and graduate students interested in group dynamics.

Guide to Program Planning and Priority Setting Marie-Hélène J. Collion, Ali Kissi, International Service for National Agricultural Research, 1995

That original publication describes a methodology coming out of years of collaboration between INRA and ISNAR. The history of that effort is well described below by the director general of INRA of that time. Since 1993 ISNAR has extended its collaboration with in a number of new domains with the full support and guidance of INRA's present director general, Arifi. Recognizing that the approaches developed jointly with Morocco can serve other developing countries, he has allowed INRA experts to participate in program formulation and priority setting exercises in other areas forthcoming in the framework of this continued collaboration.
