The Glycemic Load Diet Guide: With High Fiber: High Protein: Complex Carbs Sarah Chastain, 2014-05-12 Do you want to lose weight and keep it off Increase your energy levels If so eating the low GI High fiber high protein with With Points way could be the answer The glycemic index diet is not a true low carbohydrate diet because you don't have to count carbohydrates carbs Nor is it a low fat diet It also doesn't require you to reduce portion sizes or count calories For the same you will find selected low carb low gi recipes If you are looking for a structured diet that tells you exactly what types of foods to eat how much and when Weight Watchers might not work for you The ability to choose anything you want to eat may prove too tempting for some It is completely possible to use all your Points on less than nutritious foods unless you consciously commit to making healthier decisions They advertise trying to convince overweight people that they can lose weight without sacrificing the foods they love However this is only achieved by allowing dieters to have calories that should be consumed on healthy food with very small portions of potentially unhealthy food This strategy gives the dieter a false sense of the real nutritional changes they need to make in their lives for long term success If one seriously wants to lose weight and keep it off they need to think more comprehensively about the foods they eat without the confusing points scheme With the old points system you could use your points anyway you like But we now
