Manuals Combined: U.S. Marine Corps Basic Reconnaissance Course (BRC) References, Over 5300 total pages. MARINE RECON Reconnaissance units are the commander's eyes and ears on the battlefield. They are task organized as a highly trained six-man team capable of conducting specific missions behind enemy lines. Employed as part of the Marine Air Ground Task Force, reconnaissance teams provide timely information to the supported commander to shape and influence the battlefield. The varying types of missions a Reconnaissance team conducts depends on how deep in the battle space they are operating. Division Reconnaissance units support the close and distant battlespace, while Force Reconnaissance units conduct deep reconnaissance in support of a landing force. Common missions include but are not limited to: Plan, coordinate, and conduct amphibious ground reconnaissance and surveillance to observe, identify, and report enemy activity and collect other information of military significance. Conduct specialized surveying to include underwater reconnaissance and/or demolitions, beach permeability, and topography, routes, bridges, structures, urban/rural areas, helicopter landing zones, LZ, parachute drop zones, DZ, aircraft forward operating sites, and mechanized reconnaissance missions. When properly task organized with other forces, equipment, or personnel assist in specialized engineer, radio, and other special reconnaissance missions. Infiltrate mission areas by necessary means to include surface, subsurface, and airborne operations. Conduct Initial Terminal Guidance (ITG) for helicopters, landing craft, parachutists, air delivery, and resupply. Designate and engage selected targets with organic weapons and force fires to support battlespace shaping. This includes designation and terminal guidance of precision-guided munitions. Conduct post-strike reconnaissance to determine and report battle damage assessment on a specified target or area. Conduct limited-scale raids and ambushes.
