

Topic: Stellar Dynamics Lab

Introduction:

During previous students practical experience with the Newtonian gravity. For now, this experiment is limited to the consideration of motion in strong gravitational fields. The stars, and much smaller objects than stars, move slowly in it. This is a very limited range of possibilities. However, calculations of gravity without previous consideration of motion in strong gravitational fields are not possible. This lab contains the calculations "Stellar Dynamics" developed by the Physics Education Technology (PET) group at the University of Colorado at Boulder. From 2014, it is <https://phet.colorado.edu/en/simulations/phet-stellar-dynamics>.

The simulation shows multiple components of motion in different velocity in 2D (the vertical axis is horizontal) and is available in the 3D space of gravity for this simulation that value of G can be chosen as $6.67 \times 10^{-11} \text{ N m}^2 \text{ kg}^{-2}$ or other units divided by the appropriate calculations. For simplicity run left value for the first time as it is the most realistic value for the system, but that value of the simulation is not exactly the same as the real one.

Procedure:

Go to the "Stellar Dynamics" simulation on the PET website and carefully follow the instructions. Select the "Simulation" button on the top right, and select the "Simulation" button on the top right.

Activity 1: Check the simulation with the simulation

Look at the star's motion. The simulation correctly shows velocity and position right, and the simulation correctly shows the star's motion.

- 1. Click on the star to see the simulation. The position and the velocity in the simulation are displayed in the simulation window.
- 2. Click on the "position" button on the top right. The position and the velocity are displayed in the simulation window.
- 3. Click on the "velocity" button on the top right. The position and the velocity are displayed in the simulation window.

Position for your star: _____ units
 Velocity for your star: _____ units
 Position of star: _____ units
 Velocity of star: _____ units

Activity 2: Other Star Simulations

- 1. Click on the "Simulation" button on the top right and select the "Simulation" button on the top right.
- 2. Click on the "Simulation" button on the top right and select the "Simulation" button on the top right.
