Research Libraries, 1979 **Education 2.0** Linda Herrera, 2025-11-17 Education 2.0 offers a compelling portrait of Egypt's bold attempt to overhaul its public education system amid sweeping political and technological transformation. Drawing on extensive oral history interviews this book traces the launch and rollout of the New Education System initiated by the Ministry of Education in 2018 designed to modernize curriculum pedagogy and assessment in the digital age and change the culture of learning. The volume moves fluidly from macro level state planning to the lived experiences of teachers and students exploring the promises and pitfalls of top down reform. Conducted partly during the COVID 19 pandemic the research captures Egypt's first large scale experiment with hybrid and distance learning. Interviews with key actors from policymakers and tech developers to students and educators reveal competing visions unintended consequences and the challenges of culturally transforming education systems in a middle income country where private tutoring is rife the sector is chronically under resourced and politics overshadows policy. This book is essential reading for scholars practitioners and policymakers interested in education reform digital transformation and the role of the state in shaping learning futures in the Global South. It is also an excellent case study for courses in Middle East studies and comparative and international education.

Research Libraries, 1974 *Minoru Yamasaki* Dale Allen Gyure, 2017-11-28 The first book to reevaluate the evocative and polarizing work of one of midcentury America's most significant architects. Born to Japanese immigrant parents in Seattle Minoru Yamasaki 1912 1986 became one of the towering figures of midcentury architecture even appearing on the cover of Time magazine in 1963. His self proclaimed humanist designs merged the modern materials and functional considerations of postwar American architecture with traditional elements such as arches and colonnades. Yamasaki's celebrated and iconic projects of the 1950s and 60s including the Lambert St Louis Airport and the U S Science Pavilion in Seattle garnered popular acclaim. Despite this initial success Yamasaki's reputation began to decline in the 1970s with the mixed critical reception of the World Trade Center in New York one of the most publicized projects in the world at the time and the spectacular failure of St Louis's Pruitt Igoe Apartments which came to symbolize the flaws of midcentury urban renewal policy. And as architecture moved in a more critical direction influenced by postmodern theory Yamasaki seemed increasingly old fashioned. In the first book to examine Yamasaki's life and career Dale Allen Gyure draws on a wealth of previously unpublished archival material and nearly 200 images to contextualize his work against the framework of midcentury modernism and explore his initial successes his personal

struggles including with racism and the tension his work ultimately found in the divide between popular and critical taste
