**Plug-In Hybrid Electric Vehicles Are The Best Type Of Vehicles, Why Natural Gas Vehicles Do Not Warrant The Cost, Why Electric Cars Do Not Warrant The Cost, And The Ample Problems With Buying An Electric Vehicle** Dr Harrison Sachs,2020-02-06 This essay sheds light on why plug in hybrid electric vehicles are the best type of vehicles and elucidates why natural gas vehicles do not warrant the cost Moreover why electric cars do not warrant the cost is delineated and the ample problems with buying an electric vehicle are explicated in this essay Furthermore the criteria for how to determine if buying a car is worth the investment is demystified and how to earn substantial money online so that you can afford to finance your plug in hybrid electric vehicle purchase is expounded upon in this essay While it may seem far fetched plug in hybrid electric vehicles are the utmost best type of vehicles available for sale on the car market in the digital era Succinctly stated plug in hybrid electric vehicles are the utmost best type of vehicles since they can operate off electric power or gasoline unlike other types of vehicles The reason that hybrid vehicles are more efficient than conventional gasoline only vehicles is because they have the ability to reclaim energy that was once wasted for example the energy used when braking Plug In Hybrid 2012 Regenerative braking for instance allows plug in hybrid electric vehicles to partially recharge their battery pack Regenerative braking can be exhibited enroute and helps prolong the vehicle's driving duration before the plug in hybrid electric vehicle becomes rendered inoperable In stark contrast to a typical hybrid vehicle the plug in hybrid electric vehicle has the highly pragmatic ability to be recharged by connecting it to a wall outlet in your home or elsewhere Plug In Hybrid 2012 More customers are beginning to take heed of the possibility of procuring a plug in hybrid electric vehicles It is far more affordable it is to operate a car off of wattage as opposed to gasoline Customers can even convert their

existing hybrid vehicles into plug in hybrid electric vehicles. This process involves going to an auto body shop so that vehicular modifications can allow their hybrid vehicle to be able to be recharged when connected into a wall outlet in your home or elsewhere. Plug In Hybrid 2012 In order for a hybrid vehicle to become a plug in hybrid electric vehicle an auto mechanic will need to add extra batteries into the vehicle in order to improve the hybrid's electrical holding capacity and will also need to add a jack. Plug In Hybrid 2012 so that it can connect to the power grid. Plug In Hybrid 2012 Even though converting a hybrid vehicle into a plug in hybrid electric vehicle can be very costly it is an expenditure worth paying if you profusely utilize your vehicle. Plug in hybrid electric vehicles offer a host of benefits to vehicle owners. The extra battery capacity of the plug in hybrid is the key to reaping the benefits of the plug in hybrid electric vehicle configuration. On a conventional hybrid car that kind of extra capacity is out of reach since the hybrid vehicle never fully charges except on long freeway trips. By adding the plug in jack with the extra battery the plug in hybrid electric vehicle has the ability to use its extra capacity by running on all electric mode for an extended range of 30 miles or more. That means that instead of depleting expense gasoline the car uses electrical energy which is much cheaper. Since most trips are less than 30 miles that means the vehicle can operate in town without ever using a drop of gasoline. Plug In Hybrid 2012 Plug in hybrid electric vehicles discharge minimal tailpipe emissions relative to conventional gasoline powered vehicles. This means that they help reduce mankind's carbon footprint and decelerate the rate of climate change due to a reduction of carbon dioxide emissions in the atmosphere. Furthermore by owning a plug in hybrid electric vehicle you are less dependent on needing gasoline to fuel your vehicle than most vehicle owners. Fortunately a plug in hybrid vehicles can operate off of electricity. *Electric Vehicle Progress ,2002*
