The next great technological disruption is coming The titans of Silicon Valley are racing to build the last best computer that the world will ever need They know that whoever successfully creates it will revolutionise our relationship with technology and make billions of dollars in the process They call it conversational AI Computers that can speak and think like humans do may seem like the stuff of science fiction but they are rapidly moving towards reality In Talk to Me veteran tech journalist James Vlahos meets the researchers at Google Amazon and Apple who are leading the way to a voice computing revolution He explores how voice tech will transform every sector of society handing untold new powers to businesses upending traditional notions of privacy revolutionising access to information and fundamentally altering the way we understand human consciousness And he even tries to understand the significance of the revolution firsthand by building a chatbot version of his terminally ill father Vlahos s research leads him to one fundamental question What happens when our computers become as articulate compassionate and creative as we are \_\_\_\_\_ Brilliant and essential You ll find insights and meaning on every page and you ll keep turning them This book is dynamite NICHOLAS THOMPSON editor in chief of Wired Conversational AI is a genuine paradigm shift in our experience with technology Vlahos brings the whole story to life A thoughtful and enjoyable read TOM GRUBER co creator of Siri The baton of disruption has been passed from the smart phone to voice and Vlahos helps make sense of this tectonic shift SCOTT GALLOWAY author of The Four Voice computing is revolutionising the way we interact with our devices Talk to Me offers a road map showing how we got to this point and the opportunities and risks that lie ahead MARTIN FORD author of The Rise of the Robots Well researched and

reported written by someone with a deep understanding of the tech itself NEW YORK TIMES James Vlahos has written an excellent book on how voice computing has become more and more of a growing presence in our everyday world RAY KURZWEIL author of The Singularity Is Near    **Data Profiling and Insurance Law** Brendan McGurk KC,2019-03-21 The winner of the 2020 British Insurance Law Association Book Prize this timely expertly written book looks at the legal impact that the use of Big Data will have on the provision and substantive law of insurance Insurance companies are set to become some of the biggest consumers of big data which will enable them to profile prospective individual insureds at an increasingly granular level More particularly the book explores how i insurers gain access to information relevant to assessing risk and or the pricing of premiums ii the impact which that increased information will have on substantive insurance law and in particular duties of good faith disclosure and fair presentation of risk and iii the impact that insurers new knowledge may have on individual and group access to insurance This raises several consequential legal questions i To what extent is the use of big data analytics to profile risk compatible at least in the EU with the General Data Protection Regulation ii Does insurers ability to parse vast quantities of individual data about insureds invert the information asymmetry that has historically existed between insured and insurer such as to breathe life into insurers duty of good faith disclosure And iii by what means might legal challenges be brought against insurers both in relation to the use of big data and the consequences it may have on access to cover Written by a leading expert in the field this book will both stimulate further debate and operate as a reference text for academics and practitioners who are faced with emerging legal problems arising from the increasing opportunities that big data offers to the insurance industry    *Smart* Frederic Martel,2018-07-05

Digitization is accelerating globalization tenfold Social networks have gone mobile telephone television and towns have gone smart How did China manage to create clones of Google Facebook and YouTube and build its own censored version of the Internet How do Arab countries use social networks for their revolutions Why is there no minister for communications in the US and why does no one regulate the Internet there From Silicon Valley to Tokyo from South Africa to southern India and all the way to Cuba and Gaza this unprecedented investigation in the field covers the whole battle of the Internet and its future Drawing on hundreds of interviews in about fifty countries Frederic Martel examines the different Internets on five continents In so doing he reveals that we are moving not only into a connected globalized world but also a territorialized one Smart shows that the Internet has never been truly global and that it will become increasingly local    **The Age of**

**Surveillance Capitalism** Shoshana Zuboff,2019-01-31 THE TOP 10 SUNDAY TIMES BESTSELLER A NEW YORK TIMES NOTABLE BOOK OF THE YEAR ONE OF BARACK OBAMA S TOP BOOKS OF THE YEAR Shortlisted for The Orwell Prize 2020 Shortlisted for the FT Business Book of the Year Award 2019 Easily the most important book to be published this century I find it hard to take any young activist seriously who hasn't at least familiarised themselves with Zuboff's central ideas Zadie Smith The Guardian The challenges to humanity posed by the digital future the first detailed examination of the

unprecedented form of power called surveillance capitalism and the quest by powerful corporations to predict and control us. The heady optimism of the Internet's early days is gone. Technologies that were meant to liberate us have deepened inequality and stoked divisions. Tech companies gather our information online and sell it to the highest bidder whether government or retailer. Profits now depend not only on predicting our behaviour but modifying it too. How will this fusion of capitalism and the digital shape our values and define our future? Shoshana Zuboff shows that we are at a crossroads. We still have the power to decide what kind of world we want to live in and what we decide now will shape the rest of the century. Our choices allow technology to enrich the few and impoverish the many or harness it and distribute its benefits. *The Age of Surveillance Capitalism* is a deeply reasoned examination of the threat of unprecedented power free from democratic oversight. As it explores this new capitalism's impact on society, politics, business and technology, it exposes the struggles that will decide both the next chapter of capitalism and the meaning of information civilization. Most critically, it shows how we can protect ourselves and our communities and ensure we are the masters of the digital rather than its slaves.
