

The background of the cover is a photograph of a river flowing through a forest. The river is in the foreground, with water cascading over dark, wet rocks. The surrounding forest is dense, with trees displaying vibrant autumn colors in shades of yellow, orange, and red. The sky is not visible, as the trees fill the upper portion of the frame. The overall scene is peaceful and natural, emphasizing the book's focus on natural resources.

resource economics that is based upon a solid foundation of economic theory and empirical research. Students will not only leave the course with a firm understanding of natural resource economics but they will also be exposed to a number of case studies showing how underlying economic principles provide the basis for specific natural resource policies. Including current data and research studies, this key text also highlights what insights can be derived from the actual experience. Key features include: Extensive coverage of the major issues including energy, recyclable resources, water policy, land conservation and management, forests, fisheries, other ecosystems, and sustainable development. Introductions to the theory and method of natural resource economics including externalities, experimental and behavioral economics, benefit cost analysis, and methods for valuing the services provided by the environment. Boxed Examples and Debates throughout the text which highlight global examples and major points for deeper discussions. The text is fully supported with end of chapter summaries, discussion questions, and self test exercises in the book as well as with multiple choice questions, simulations, references, slides, and an instructor's manual on the Companion Website. This text is adapted from the best selling *Environmental and Natural Resource Economics* 11th edition by the same authors. Cornell University Courses of Study Cornell University, 2007
