Thinking Nature and the Nature of Thinking Willemien Otten, 2020-03-17 A fresh and more capacious reading of the Western religious tradition on nature and creation. *Thinking Nature and the Nature of Thinking* puts medieval Irish theologian John Scottus Eriugena 810-877 into conversation with American philosopher Ralph Waldo Emerson 1803-1882. Challenging the biblical stewardship model of nature and histories of nature and religion that pit orthodoxy against the heresy of pantheism, Willemien Otten reveals a line of thought that has long made room for nature's agency as the coworker of God. Embracing in this more elusive idea of nature in a world beset by environmental crisis, she suggests we will allow us to see nature not as a victim but as an ally in a common quest for re-attunement to the divine. Putting its protagonists into further dialogue with such classic authors as Augustine, Maximus the Confessor, Friedrich Schleiermacher, and William James, her study deconstructs the idea of pantheism and paves the way for a new natural theology.

Table Scraps and Other Essays Juyanne James, 2019-12-18 *Table Scraps and Other Essays* is for all intents and purposes memoir writing. At the heart of the twenty-two true stories is an African American female who, as a child along with her siblings, must learn the value of hard work as hired hands. James's young spirit is often at odds with her growing family, especially with a father figure who ignores his duties as husband and provider. She has a strong loving mother who insists on keeping the family together. James learns to trust and depend on the guardians of her small Louisiana community: teachers who are eventually forced to move away from the area when the local schools are integrated. Many years later, James returns home figuratively and literally on occasion from the apartment where she lives in New Orleans and reconnects with a father who seeks forgiveness for his earlier betrayal. He spends each day attempting to make up for the ill treatment of his wife and children. In these essays, James shares her love of nature both as a means of escape from her troubled family and as inspiration for her writing.

Unfolding Consciousness Edi Bilimoria, 2024-03-11 Exploring the Living Universe and Intelligent Powers in Nature and Humans, author Edi Bilimoria heralds the new science of consciousness and offers the readers a roadmap and necessary tools to achieve future growth. Presented in three volumes plus volume IV, it contains references, resources, and further reading. They reveal the unity of the Eastern and Western branches of our perennial wisdom. Bilimoria shows how science seeks truth using a synthesis of both traditions. Evidence from a wide range of sources—scientific, medical, philosophical, religious, and cultural—is put forward to argue the case that humans are spiritual beings primarily and not merely complicated biological machines. Bilimoria teaches that consciousness is not the product of matter.

Oliver Wendell Holmes Jr., Pragmatism and Neuroscience Jay Schulkin, 2019-08-17 This book explores the cultures of philosophy and the law as they interact with neuroscience and biology through the perspective of American jurist Oliver Wendell Holmes Jr and the pragmatist tradition of John Dewey Schulkin proposes that human problem solving and the law are tied to a naturalistic realistic and an anthropological understanding of the human condition The situated character of legal reasoning given its complexity like reasoning in neuroscience can be notoriously fallible Legal and scientific reasoning is to be understood within a broader context in order to emphasize both the continuity and the porous relationship between the two Some facts of neuroscience fit easily into discussions of human experience and the law However it is important not to oversell neuroscience a meeting of law and neuroscience is unlikely to prove persuasive in the courtroom any time soon Nevertheless as knowledge of neuroscience becomes more reliable and more easily accepted by both the larger legislative community and in the wider public through which neuroscience filters into epistemic and judicial reliability the two will ultimately find themselves in front of a judge A pragmatist view of neuroscience will aid and underlie these events
