A Sailor's History of the U.S. Navy Thomas J Cutler, 2005-01-15 Today's sailors have too little appreciation of their heritage To counter this problem Thomas J Cutler has compiled a history of our naval heritage in the form of A Sailor's History of the U S Navy The work is unique in two important ways First it is written thematically rather than chronologically

This allows recent history to be blended with more distant but important events in ways that will reinforce the timelessness as well as the timeliness of the U S Navy thereby having a greater appeal to today's sailor. There are a number of themes being used the most obvious are manifested in chapters with the themes of honor, courage, and commitment but others serve as useful vehicles as well. For example, there is a chapter called "What's in a Name" that briefly discusses how ships have been named and then uses the many ships that have carried the name Enterprise as the theme for presenting significant portions of the Navy's history. The other unique characteristic of this history is that it focuses wherever possible on the roles of ALL sailors rather than just the officers. That is not to say that Jones and Decatur are not there but that the emphasis is along the lines of the crew of the Bon Homme Richard fought on into the night rather than Jones fought. Also, there are plenty of individual sailor heroes who can stand alongside the Perrys and the Farraguts: Boatswain's Mate First Class Williams who won the Medal of Honor in Vietnam, Dorie Miller of Pearl Harbor fame, Gunner's Mate Third Class Paul Henry Carr at the battle off Samar, etc. Some emphasis upon what it was like to be a sailor working and living conditions at different times is included as well.

General Naval Tactics Milan Vego, 2020-10-15. In *General Naval Tactics*, Naval War College professor and renowned tactical expert Milan Vego describes and explains those aspects of naval tactics most closely related to the human factor. Specifically, he explains in some detail the objectives and methods, elements of tactical employment of naval forces, command and control, combat support, tactical design, decision making and planning, execution, leadership, doctrine, and training. Vego derives certain commonalities of naval tactics that occurred in recent and distant wars at sea. Many parts of his theoretical constructs are based on works of a number of well-known and influential naval theoreticians such as Admirals Alfred T. Mahan, Bradley A. Fiske, Raoul Castex, and Ren Daveluy, and influential naval theoreticians. Whenever possible, the author illustrates each aspect of theory by carefully selected examples from naval history, making the theory more understandable and interesting. Vego aims to present theory that is general in nature and therefore more durable in its validity. The more general the theory, the greater the possibility of accommodating changes based on new interpretations of past events and as a result of gaining fresh insight from the lessons learned.

Developing the Naval Mind Benjamin F. Armstrong, 2021-11-15. Throughout the history of the U S Navy and Marine Corps, leading officers and strategists have advocated for formal colleges and schools for naval officers but have also made the case that true naval professionalism requires a career-long dedication to learning and to self-improvement. This was the impetus behind the very founding of the U S Naval Institute by officers who believed that the Navy's lack of support for their education meant they needed to create their own organization for self-study and cooperative learning. Naval luminaries like admirals William Sims and Ernest King continued to campaign for self-study and the personal pursuit of professional knowledge during the twentieth century, distributing lists of suggested books for officers to read and promoting their ideas widely through speeches and published works. While recommending that officers read broadly in pursuit of individual knowledge is an important part of creating a

truly educated and professional Fleet and Fleet Marine Force it is also important for leaders in the sea services to offer mentorship and create opportunities for discourse that encourages group learning Developing the Naval Mind serves as a how to manual and syllabus for leaders to create and lead wardroom ready room and work center discussion groups across the fleet to create a more educated and professionally engaged Navy and Marine Corps International Law for Seagoing Officers, 7th Editi Craig H Allen,2022-11-15 The seventh edition of this Blue and Gold Series book brings clarity and context to international law for the seagoing professional This book is the only work that addresses the international law of the sea from the perspective of the United States For those who operate on under and over the sea international law can sometimes be as complex as it is important Written by the same former seagoing officer and maritime law professional who authored the current edition of Farwell s Rules of the Nautical Road this book was designed to bring clarity and context to international law for the seagoing professional Following an introduction to public international law and a short history of the law of the sea the book describes the rules that apply in ports and in the adjacent maritime zones including the territorial sea exclusive economic zone archipelagic waters and the high seas A highlight of the book are the chapters that focus on subjects of greatest interest to the seagoing professional including military and intelligence activities in the maritime domain maritime law enforcement activities and the use of force at sea The appendices include the text of the 1982 UN Convention on the Law of the Sea and the U S Senate s understandings of key provisions of the convention Whether an academy cadet a midshipman a seasoned commanding officer or master mariner readers of this thorough and timely book will be rewarded with a far greater understanding of the international laws that govern ships and mariners at sea New in this edition Over a dozen new cases by courts and arbitration panels interpreting UNCLOS including the South China Sea dispute between the Philippines and China Coverage of Commercial Seafarer protections under Maritime Labor Convention Global Responses to the Mediterranean Migrant Crisis Coverage of the law protecting our vital submarine cables Expanded coverage of unmanned and autonomous vessels and aircraft Coverage on vessel health safety and quarantine measures applicable in the COVID 19 Pandemic A new chapter surveying issues the U S Senate should consider in any decision regarding ratification of UNCLOS A new appendix setting out the U S Navy and Coast Guard policies on sovereign immunity of government vessels and aircraft
