**APC New Discovery - Class 3** S.C. Maheshwari, Vineeta Mittal, The early schooling years in a child's life are of extreme importance. These are the times when he focuses his eyes and mind on everything that is new and appealing. His mind is untrained and he has learned only the basics of communication. His vocabulary is limited but he is eager to learn. Whatever is presented to him he absorbs like a sponge. His attention span is short and he requires constant reinforcement. What interests him most is things and events around him. This is the golden opportunity to inculcate in him a spirit of adventure and inquiry to teach him to ask to reason and to pick up healthy habits. With this in mind our publisher decided to bring out a science series for the junior classes.
