Bucher, 2006-07-26 If a business expects to be a player in their market segment their products must have the quality expected by their customers. It will benefit companies that want to implement a program and also those that already have one in place. Some industries have tighter requirements than others on how they treat calibration some are more specific about how their standards are read while being vague about what is needed to meet calibration. Is there one tried and true quality calibration system that every organization can use as a foundation for its personalized program. There certainly is and The Quality Calibration Handbook describes it. By using the quality calibration system outlined and demonstrated any organization can put together its own version to meet its specific requirements and or regulations. Quality calibration systems are the very foundation for improving research and development R D production and quality assurance arenas through accurate reliable and traceable calibrations of their test equipment. By ensuring the calibration of test equipment used in the production of genetic identity kits used by law enforcement at crime scenes the guilty are often caught and the innocent exonerated. At pharmaceutical companies calibration technicians quietly lay the foundation for quality treatments that help keep us healthy cure diseases and sometimes prevent death.
