## **Near Death In The Icu:**

**Near Death in the ICU** Laurin Bellg, 2015-12-10 For nearly twenty years Laurin Bellg MD has been present at the bedside of critically ill and dying patients As she has worked to create an accepting and supportive relationship with them her patients have shared with her the mysterious experience they sometimes have of apparently seeing beyond our physical world Dr Bellg tells her patients engaging powerful and sometimes humorous stories in her book *Near Death in the ICU Stories from Patients Near Death and Why We Should Listen to Them* published in 2016 by Sloan Press She also invites us to consider that bearing witness to a patient's near death experience is a respectful and important part of medical care a way for families to support their loved ones and an important part of the patient's healing A board certified critical care physician Dr Bellg is the Chair of Medicine and ICU Medical Director for two busy intensive care units in NE Wisconsin Dr Bellg has also contributed to other publications about near death studies and is an invited speaker throughout the United States on the topic

**The Near-death Experiences of Hospitalized Intensive Care Patients** Penny Sartori, 2008 Most research into near death experiences NOEs is based on anecdotal accounts which have no medical data to verify proximity to death or support the reports This study is the largest of its kind in the United Kingdom and the first long term prospective study of NOEs in existence

***Injection of Faith*** Raul Meza, 2020-08-31 **Just Caring** Leonard M. Fleck, 2009-03-30 What does it mean to be a just and caring society when we have only limited resources to meet unlimited health care needs Do we believe that all lives are of equal value Is human life priceless Should a just and caring society refuse to put limits on health care spending In *Just Caring* Leonard Fleck reflects on the central moral and political challenges of health reform today He cites the millions of Americans who go without health insurance thousands of whom die prematurely unable to afford the health care needed to save their lives Fleck considers these deaths as contrary to our deepest social values and makes a case for the necessity of health care rationing decisions The core argument of this book is that no one has a moral right to impose rationing decisions on others if they are unwilling to impose those same rationing decisions on themselves in the same medical circumstances Fleck argues we can make health care rationing fair in ways that are mutually respectful if we engage in honest rational democratic deliberation Such civic engagement is rare in our society but the alternative is endless destructive social controversy that is neither just nor caring

**Evaluating Critical Care** William J. Sibbald,Julian F.

Bion,2012-12-06 Measuring the quality of a complex service like critical care that combines the highest technology with the most intimate caring is a challenge Recently consumers clinicians and payers have requested more formal assessments and comparisons of the quality and costs of medical care 2 Donabedian 1 pro posed a framework for thinking about the quality of medical care that separates quality into three components structure process and outcome An instructive analogy for understanding this framework is to imagine a food critic evaluating the quality of a restaurant The critic might comment on the decoration and lighting ofthe restaurant how close the tables are to each other the extent ofthe wine list and where the chef trained These are all evaluations of the restaurant structure In addition the critic might comment on whether the service was courteous and timely measures of process Finally the critic might comment on outcomes like customer satisfaction or food poisoning Similarly to a health care critic structure is the physical and human resources used to deliver medical care Processes are the actual treatments offered to patients Finally outcomes are what happens to patients for example mortality quality of life and satisfaction with care Table 1 There is a debate about which of these measurements is the most important measure of quality

**In Defiance of Death** Kenneth A. Fisher,Lindsay E. Rockwell,Missy

Scott,2008-03-30 Death is a natural part of life But it has become a painful protracted humiliating process that is often inappropriate for the healthcare patient puts an undue financial and emotional burden on the family and provides a model of improper care for physicians in training And it s expensive about 22 percent of all medical expenditures are for people in the last year of their lives Further while studies show that 90 percent of all people would prefer to die at home surrounded by family and friends the reality is that more than 70 percent die in institutions As Dr Ken Fisher argues so passionately in this book it s time for a change End of life care in the U S has evolved over the years into a nightmare for patients and family members and it has created a near crushing financial burden on the medical system that is not just excessive but

unsustainable It has driven the cost of healthcare out of reach for many people and it is a large factor in preventing the creation of universal coverage In *Defiance of Death* reviews the current state of end of life care and highlights its many problems from a variety of economic political and social perspectives Fisher and Rockwell illuminate the ethical dilemmas we all face as technology allows us to prolong life but at a huge human and financial cost This book documents these problems and provides a historical perspective of how our medical system evolved It argues that America s defiance of death is far too costly and recommend that all stakeholders including the public medical community Congress and business leaders join together to create a system that improves end of life care for everyone involved This book with workable solutions to improve our medical system helps point the way
