*Linked Data for Digital Humanities* Terhi Nurmikko-Fuller, 2023-08-18 *Linked Data for Digital Humanities* provides insights into how digital technologies can enrich and diversify humanities scholarship and make it pioneering in the digital age. Written in non specialist language the book illustrates how information is captured published represented accessed and interpreted using computational systems and in doing so shows how technologies actively shape the way we understand what we encounter. Focusing as it does on underlying Web architecture and projects accessible online the book has an inherently international focus. The interdisciplinary case study examples include bibliographic data from works published in England between 1470 and 1700 literature from ancient Iraq jazz performances predominantly from the USA in the 1930s and even reach as far as an alien fictional future. Whilst these case study examples span vast spatio temporal distances they all share a common thread in the use of the Linked Data information publication paradigm. Using existing computer science methods as well as processes such as ontology development and database design the book also includes reflections on practical considerations and offers advice about how to take institutional policies socio cultural sensitivities and economic models into consideration when implementing Linked Data projects. *Linked Data for Digital Humanities* discusses technological issues in the context of Humanities scholarship bridging disciplines and enabling informed conversations across disciplinary boundaries. It will be of interest to humanities scholars computer and data scientists and library and information scientists.

Our expert industry analysis and practical solutions help you make better buying decisions and get more from technology. **Rock • Paper • Pixels** Patrick Aievoli, 2025-01-20 The purpose of this book is to avail faculty and students of the many different innovations events effects and back stories equated with the advent of this new era of communications and its impact on our world. At our core we are a species that needs to communicate and to find a way to properly represent those messages. Since the beginning of recorded history mankind has always attempted to communicate and to keep track of its endeavors and accomplishments. Now by using interaction design and modern digital media it has become possible to present our story through many current and evocative platforms. As each generation comes of age this new method is being utilized in all areas of their communication choices. These new generations desire their communication at a different rate than its predecessors. They want their information Internet ready and interactive. They are involved in the immediate and that choice is not going away. Interactive media is here to stay and has new rules and new effects. It is changing our economies our societies and especially us as individuals. The main goal of this book is to help you see how it started where it is going and how to be on the right side of this transformation. How to take your first steps in that new direction and how to understand the effects of this new form of communication while being aware of its abilities and its dangers. As a friend once said no matter how thin you slice it there are always two sides. *Flying Magazine* ,2002-03
