The Magic of Science: a Manual of Amusing and Instructive Scientific Experiments ... James Wylde, 1873 **The magic of science, a manual of easy scientific experiments** James Wylde, 1873 *Scientific Foundations and Principles of Practice in Musculoskeletal Rehabilitation* David J. Magee, James E. Zachazewski, William S. Quillen, 2007-02-14

Musculoskeletal Rehabilitation Volume 2 Scientific Foundations and Principles of Practice provides a thorough review of the basic science information concerning the tissues of the musculoskeletal system impacted by injury or disease as well as the guiding principles upon which rehabilitation interventions are based. This volume divides information into two sections: scientific foundations and principles of intervention, providing readers with a guiding set of clinical foundations and principles upon which they can easily develop treatment interventions for specific impairments and functional limitations. Clinical application case studies help readers apply what they learn in the classroom to real life situations. Evidence-based content uses over 5 000 references to support the basic science information, principles for rehabilitation interventions, and provide the best evidence and physiological reasoning for treatment. Over 180 tables and 275 text boxes highlight key points within the text for better understanding. Expert editors: David Magee PhD PT, James Zachazewski DPT SCS ATC, Sandy Quillen PT PhD SCS FACS, and over 70 contributors provide authoritative guidance on the foundations and principles of musculoskeletal rehabilitation practice.
