Reading, Writing, and Racism Bree Picower, 2021-01-26 An examination of how curriculum choices can perpetuate White supremacy and radical strategies for how schools and teacher education programs can disrupt and transform racism in education When racist curriculum goes viral on social media it is typically dismissed as an isolated incident from a bad teacher Educator Bree Picower however holds that racist curriculum isn't an anomaly It's a systemic problem that reflects how Whiteness is embedded and reproduced in education In *Reading Writing and Racism* Picower argues that White teachers must reframe their understanding about race in order to advance racial justice and that this must begin in teacher education programs Drawing on her experience teaching and developing a program that prepares teachers to focus on social justice and antiracism Picower demonstrates how teachers' ideology of race consciously or unconsciously shapes how they teach race in the classroom She also examines current examples of racist curricula that have gone viral to demonstrate how Whiteness is entrenched in schools and how this reinforces racial hierarchies in the younger generation With a focus on institutional strategies Picower shows how racial justice can be built into programs across the teacher education pipeline from admission to induction By examining the who what why and how of racial justice teacher education she provides radical possibilities for transforming how teachers think about and teach about race in their classrooms *Mastering Large*

Datasets with Python John Wolohan, 2020-01-15 Summary Modern data science solutions need to be clean easy to read and scalable In *Mastering Large Datasets with Python* author J T Wolohan teaches you how to take a small project and scale it up using a functionally influenced approach to Python coding You'll explore methods and built-in Python tools that lend themselves to clarity and scalability like the high performing parallelism method as well as distributed technologies that allow for high data throughput The abundant hands-on exercises in this practical tutorial will lock in these essential skills for any large scale data science project Purchase of the print book includes a free eBook in PDF Kindle and ePub formats from Manning Publications About the technology Programming techniques that work well on laptop sized data can slow to a crawl or fail altogether when applied to massive files or distributed datasets By mastering the powerful map and reduce paradigm along with the Python based tools that support it you can write data centric applications that scale efficiently without requiring codebase rewrites as your requirements change About the book *Mastering Large Datasets with Python* teaches you to write code that can handle datasets of any size You'll start with laptop sized datasets that teach you to parallelize data analysis by breaking large tasks into smaller ones that can run simultaneously You'll then scale those same programs to industrial sized datasets on a cluster of cloud servers With the map and reduce paradigm firmly in place you'll explore tools like Hadoop and PySpark to efficiently process massive distributed datasets speed up decision making with machine learning and simplify your data storage with AWS S3 What's inside An introduction to the map and reduce paradigm Parallelization with the multiprocessing module and pathos framework Hadoop and Spark for distributed computing Running AWS jobs to
