North Carolina Reports North Carolina. Supreme Court, 2005. Cases argued and determined in the Supreme Court of North Carolina. For Security Personnel, HARD EMPTY HAND CONTROL, 2020 Mürsel Sevindik, 2020-04-14. This book covers Hard Empty Hand Control issues for law enforcement officers. The goal is to provide police officers with an understanding of the principles of Hard Empty Hand Control techniques. Hard Empty Hand Control techniques are defined as striking techniques. These techniques are used to control active aggression with empty hands and feet when the intermediate use of weapons is justified but are not tactically available. The term "hard" is descriptive of the nature of the technique. Hard empty hand strikes are always defensive, not offensive. These techniques are taught to protect lives from immediate danger. All hard empty hand control techniques are basic in nature; however, they address non-lethal use of force situations and are generally reliable and effective when properly utilized. Police officers should learn and demonstrate knowledge of the striking areas as well as methods of striking. When these techniques become necessary, loud, clear, repetitive verbal commands are an important aspect of the control process. The subject needs to know what the officer desires him/her to do. In addition, verbal and physical de-escalation is always preferred and should be attempted if applicable. In training, safety is paramount. Perfect practice makes perfect. Proper technique is more important than the speed of technique application. Proficiency will increase the speed proportionally. Topics and techniques presented in this book will be of both great interest and great value to trainers and students of law enforcement.

For Security Personnel, DEFENSIVE BATON, 2020 Mürsel Sevindik, 2020-04-17. This book covers Defensive Baton issues for law enforcement officers. The goal is for the officers to understand and demonstrate the tactical fundamentals of the baton in an operational setting and its proper use as an intermediate impact weapon. One of the major dilemmas facing law enforcement today is the continually increasing number of assaults on police officers as they perform their duties. How can the officer respond to this critical situation without resorting to deadly force? Modern law enforcement tool has been developed to increase officers' ability to protect themselves, particularly in those cases not justifying the use of deadly force. That tool is the baton. The ability to use force lawfully against the public is the primary factor which distinguishes the police from the rest of society. The police service is unique in society as they are the only civil organization that has been given the authority to use force. As a result of this responsibility, the use of force by the police comes under close scrutiny by both the public and the courts. The baton can be

utilized when empty hand techniques are not effective A trained officer who is proficient in the use of the baton is better able to protect himself and is less likely to resort to the use of his firearm The main purpose of the baton is to stun or temporarily disable rather than cause permanent injury The baton is not designed as a lethal weapon and is not an instrument of punishment It is to be used in a skillful manner to counter or stop an aggressive subject The techniques shown in this booklet has been universally accepted and are defensible in court They are designed to work efficiently for all officers male female small large fit and the less fit Topics and techniques presented in this book will be of both great interest and great value to trainers and students of law enforcement

For Security Personnel, CONDUCTING SUSPECT SEARCHES, 2020 Mürsel Sevindik, 2020-04-16 This book covers Suspect Searching issues for law enforcement officer The goal for officers to understand and be able to perform proper techniques of searching a subject and escorting him to a designated area A search is a careful systematic examination of the suspect s person at the scene of a crime or immediately after apprehension Body searching is a vague subject It is very difficult to perform in a proper and effective way In body searching there is close contact between the officer and suspect Being in such close contact sometimes creates a critical situation Everyone placed under arrest must be searched There should be no exceptions to this rule Failure to conduct a proper search could cost an officer s or civilians life Generally there is no legal distinction between searching and handcuffing a man or a woman Gender should not be an inhibiting factor in the application of proper techniques However these techniques should be tempered with the individual officer s good judgment Police officers should not confuse the object of the search with the application of the search technique A cooperative suspect should not lull the police officer into a false sense of security The suspect s attitude is no guarantee that they will not attempt to escape when such an opportunity presents itself Topics and techniques presented in this book will be of both great interest and great value to trainers and students of law enforcement
